

Condor Hospitality Trust, Inc. Post Transition Analysis | A Strong Foundation for Value Creation

Document Release Date: January 10, 2018

The management of Condor Hospitality Trust, Inc. ["Condor" or "the Company"] believes that the release of this information is appropriate at this time given the unique circumstances at this point in the Company's transformation.

The Company urges caution in considering the information and outlook for the Company disclosed in this document, and investors should consult their financial advisors with respect to the Company's equity securities. Please also see "Forward-Looking Information" appearing in this document.

Condor Hospitality Trust, Inc. [NYSE American: CDOR]

Post Transition Analysis | A Strong Foundation for Value Creation

Document Purpose: Management's intent with this document is to provide: [1] a perspective on Condor's current undervaluation, [2] an outlook for 2018, [3] clarity on the portfolio, and [4] a review of 2017 portfolio outperformance.

During the period from January 1, 2015 through December 31, 2017, the management team of Condor Hospitality Trust completed a dramatic transformation of the Company's portfolio, equity capitalization, and debt structure. This transformation resulted in a higher-quality portfolio and an enhanced balance sheet but, management believes, also created challenges in assessing and valuing the Company. More specifically, given the simultaneous disposition of 53 legacy hotels either sold or under contract at year-end 2017, totaling \$161 million in gross proceeds, and the acquisition of 14 new investment platform ["NIP"] hotels acquired or under contract for the same period, totaling \$276 million in acquisitions, understanding the revenue and income generating potential of this newly established platform has been challenging for analysts and investors. Condor management believes it now has a strong foundation to pursue shareholder value creation and this document's intent is to provide clarity on management's view of valuation, 2018 outlook, the current portfolio, and 2017 outperformance.

Valuation Summary [Page 3 and Appendix A for further detail.]

A valuation analysis indicates to management that Condor appears to be undervalued in the marketplace today. As shown in the below graph, three commonly-used valuation methodologies indicate a value estimate for Condor common stock [CDOR] to be between \$12.26 and \$15.33 per share, substantially higher than its 60-day VWAP price of \$10.01 as of December 31, 2017. A discussion of the methodologies with calculations is included in Appendix A.

2018 Outlook [Appendix B for further detail.]

Condor expects its portfolio of high-quality, select-service assets with an average age of 4 years to continue to outperform in 2018. Condor's forecasted 2018 RevPAR growth of 3.0% to 4.5% is greater than STR and CBRE 2018 U.S. RevPAR forecasts of 2.2% and 2.6%, respectively.

2018 Outlook (Millions, except per share amounts)	Low	High
RevPAR Growth (13 New Investment Platform Hotels owned as of 12.31.2017)	3.0%	4.5%
2018 Outlook for 17-Hotel Portfolio

2018 Portfolio

Condor's management believes the transitioned portfolio is poised for scale and growth in 2018. The outlook provided, excluding Revenue per Available Room [RevPAR], is forecast for Condor's portfolio comprised of 15 premium-branded, select-service NIP assets (inclusive of two currently under contract) and two legacy assets. As previously communicated, the two remaining legacy assets are higher-quality legacy hotels that are being retained in order to maximize the potential sale prices of the assets.

2017 Outperformance

Condor's new investment platform hotels achieved positive RevPAR growth in every quarter of 2017. FY2017 RevPAR growth for the same-store new investment platform hotels is estimated to be 4.9% to 5.1%. STR forecasts U.S. RevPAR in 2017 to be 2.5%. Condor's fourth quarter RevPAR growth is estimated to be 2.4% to 2.8%.

Valuation Methodologies

Further detail on the valuation methodologies can be found in Appendix B. All valuations are based on the 2018 Outlook Forecast numbers for the 17-hotel portfolio. Appendix C details the calculation of all peer metrics, including Net Asset Value [NAV] premium, Adjusted Funds From Operations [AFFO] multiple, and implied cap rate.

[A] Peer Premium NAV Implied Valuation:

The table to the right details management's perspective on the NAV of the 2018 portfolio. Management estimates that the NAV/share of the portfolio is between \$12.22 and \$13.09. This estimate is based on an 8% cap rate assumption for the new investment platform hotels and a 2.7x revenue multiple for the remaining two legacy assets, a cap rate and revenue multiple that management believes are reasonable and conservative. Management expects one of the legacy assets, the Quality Inn Solomons, to trade at a higher multiple due to the attractive redevelopment opportunity of the land and marina, and management believes the Atlanta Aloft likely has a substantially higher value than that attributed by an 8% cap rate given the recent market sales comparables.

Condor's 60-day VWAP of \$10.01 as of December 31, 2017 indicates to management that Condor trades at a discount in excess of 20% to its NAV while its peer group is currently trading at a premium. If Condor traded in line with the NAV premium of its peer group, CDOR stock price range would be \$12.26 to \$13.14, a substantially higher value than the current trading price.

[B] Peer AFFO Multiple Implied Valuation:

Management believes Condor's 17-hotel portfolio will generate approximately \$1.13 to \$1.19 of AFFO in 2018. This indicates to management that Condor is currently trading at an 8.4x to 8.9x AFFO trading multiple, a substantial discount to its peer group average of 12.4x.

Applying the current peer average AFFO multiple to Condor's 2018 AFFO range indicates a fair value of CDOR stock of \$13.97 to \$14.78, a substantially higher value than the current trading price.

[C] Peer Cap Rate Implied Valuation:

Management forecasts Condor's 2018 NOI for the 15-hotel NIP portfolio to be \$24.9 to \$25.6 million. Condor's peers currently trade at an average implied cap rate of 7.3%. Applying this cap rate to Condor's forecast NIP 2018 NOI, and adding an estimate for the value of the two legacy hotels, results in a value of CDOR stock of \$14.39 to \$15.33, a substantially higher value than Condor's current trading price.

Attractive Dividend Yield and Coverage

Condor's annualized dividend of \$0.78/share, paid quarterly, represents an attractive yield of 7.8%, currently the highest yield of its peer group. Importantly, this dividend is fully-covered by operating income and represents only a 66.1% AFFO payout ratio based on 2018 Forecasted AFFO/share.

*Management believes the entities listed on Appendix C to be Condor's primary publicly-traded hotel REIT peers.

Peer Premium NAV Implied Valuation Calculation:

NAV (Millions, except per share amounts)	Low	High
New Investment Platform Forecast 2018 NOI (15 Hotels)	\$24.9	\$25.6

Appendix D | Reconciliation of Non-GAAP Measures

Non-GAAP Financial Measures

Non-GAAP financial measures are measures of our historical financial performance that are different from measures calculated and presented in accordance with accounting principles generally accepted in the United States of America (“GAAP”). We report Funds from Operations (“FFO”), Adjusted FFO (“AFFO”), Earnings Before Interest, Taxes, Depreciation, and Amortization (“EBITDA”), Adjusted EBITDA, and Hotel EBITDA, and Net Operating Income (“NOI”) as non-GAAP measures that we believe are useful to investors as key measures of our operating results and which management uses to facilitate a periodic evaluation of our operating results relative to those of our peers. Our non-GAAP measures should not be considered as an alternative to U.S. GAAP net earnings as an indication of financial performance or to U.S. GAAP cash flows from operating activities as a measure of liquidity. Additionally, these measures are not indicative of funds available to fund cash needs or our ability to make cash distributions as they have not been adjusted to consider cash requirements for capital expenditures, property acquisitions, debt service obligations, or other commitments.

We have also presented financial measures that take into account certain estimates on the timing of planned acquisitions and dispositions throughout 2018.

All amounts presented include our portion of the results of our unconsolidated Atlanta JV.

Earnings Before Interest, Taxes, Depreciation, and Amortization (“EBITDA”), Adjusted EBITDA, Hotel EBITDA, and Net Operating Income (“NOI”)

We calculate EBITDA and Adjusted EBITDA by adding back to net earnings or loss certain non-operating expenses and certain non-cash charges which are based on historical cost accounting that we believe may be of limited significance in evaluating current performance. We believe these adjustments can help eliminate the accounting effects of depreciation and amortization and financing decisions and facilitate comparisons of core operating profitability between periods. In calculating EBITDA, we add back to net earnings or loss interest expense, gain or loss on the disposal of assets, and depreciation and amortization expense. In calculating Adjusted EBITDA, we adjust EBITDA to add back acquisition expense, which is a cash charge, and stock –based compensation expense and the amortization of certain fees, which are non-cash charges. EBITDA and Adjusted EBITDA, as presented, may not be comparable to similarly titled measures of other companies.

We believe EBITDA and Adjusted EBITDA to be useful additional measures of our operating performance, excluding the impact of our capital structure (primarily interest expense), our asset base (primarily depreciation and amortization expense), and other items we do not believe are representative of the results from our core operations.

The Company further excludes general and administrative expenses, other non-operating income or expense, and certain hotel and property operations expenses that are not allocated to individual properties in assessing hotel performance (primarily certain general liability and other insurance costs, land lease costs, and office and banking fees) from Adjusted EBITDA to calculate Hotel EBITDA. The Company then reduces Hotel EBITDA by 4% of revenue to calculate NOI. Hotel EBITDA and NOI, as presented, may not be comparable to similarly titled measures of other companies.

Hotel EBITDA and NOI are intended to isolate property level operational performance over which the Company’s hotel operators have direct control. We believe Hotel EBITDA and NOI are helpful to investors as they better communicate the comparability of our hotels’ operating results for all of the Company’s hotel properties and are used by management to measure the performance of the Company’s hotels and the effectiveness of the operators of the hotels.

Appendix D | Reconciliation of Non-GAAP Measures (continued)

Funds from Operations (“FFO”) and Adjusted FFO (“AFFO”)

We calculate FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts (“NAREIT”), which defines FFO as net earnings or loss computed in accordance with GAAP, excluding gains or losses from sales of real estate assets and the depreciation and amortization of real estate assets. FFO is calculated both for the Company in total and as FFO attributable to common shares and partnership units, which is FFO reduced by preferred stock dividends. AFFO is FFO attributable to common shares and partnership units adjusted to exclude items we do not believe are representative of the results from our core operations, including non-cash stock-based compensation expense and the amortization of certain fees, and cash charges for acquisition costs. All REITs do not calculate FFO and AFFO in the same manner; therefore, our calculation may not be the same as the calculation of FFO and AFFO for similar REITs.

We consider FFO to be a useful additional measure of performance for an equity REIT because it facilitates an understanding of the operating performance of our properties without giving effect to real estate depreciation and amortization, which assumes that the value of real estate assets diminishes predictably over time. Since real estate values have historically risen or fallen with market conditions, we believe that FFO provides a meaningful indication of our performance. We believe that AFFO provides useful supplemental information to investors regarding our ongoing operating performance that, when considered with net income and FFO, is beneficial to an investor’s understanding of our operating performance.
