EXPLANATORY NOTE

Popeyes Louisiana Kitchen, Inc. (the “Company”) is filing this Amendment No. 1 (this “Form 10-Q/A”) to its Quarterly Report on Form 10-Q for the quarterly period ended July 14, 2013 (the “Form 10-Q”), originally filed with the Securities and Exchange Commission on August 1, 2013, solely for the purpose of correcting the form of the chief executive officer and the chief financial officer certifications pursuant to Rule 13a-14(a), as adopted pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (the “Exhibits”). The Company had in its possession copies of the Exhibits in the correct form at the time of the filing of the Form 10-Q; however, incorrect forms of the Exhibits were inadvertently attached to the Form 10-Q due to an error in the filing process. This Form 10-Q/A does not reflect events occurring after the filing of the Form 10-Q or modify or update the disclosure contained therein in any way other than to include the corrected Exhibits as described above, along with currently dated versions of the chief executive officer and the chief financial officer certifications pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, and to modify the cover page to reflect the Company’s current name and filer status.

Notes to Unaudited Condensed Consolidated Financial Statements

Note 1 — Description of Business

AFC Enterprises, Inc. (“AFC” or the “Company”) develops, operates and franchises quick-service restaurants under the trade names Popeyes[®] Chicken & Biscuits and Popeyes[®] Louisiana Kitchen (collectively “Popeyes”) in 47 states, three territories, and 28 foreign countries.

Note 2 — Significant Accounting Policies

The Company’s significant accounting policies are presented in Note 2 to the Company’s consolidated financial statements for the fiscal year ended December 30, 2012, which are contained in the Company’s 2012 Annual Report on Form 10-K (“2012 Form 10-K”). The significant accounting policies that are most critical and aid in fully understanding and evaluating the reported financial results include the following:

Basis of Presentation. The accompanying condensed consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission (the “SEC”) for interim financial information. Accordingly, certain information required by generally accepted accounting principles in the United States (“GAAP”) for complete financial statements is not included. The Consolidated Balance Sheet data as of December 30, 2012 that is presented herein was derived from the Company’s audited consolidated financial statements for the fiscal year then ended. The condensed consolidated financial statements as of July 14, 2013, have not been audited by the Company’s independent registered public accountants, but in the opinion of management, they contain all normal recurring adjustments necessary for a fair statement of the Company’s financial condition and results of operations for the interim periods presented. Interim period operating results are not necessarily indicative of the results expected for the full fiscal year. The Company suggests that the accompanying financial statements be read in conjunction with the consolidated financial statements and notes thereto included in the 2012 Form 10-K. Except as disclosed herein, there has been no material change in the information disclosed in the notes to our consolidated financial statements included in the 2012 Form 10-K.

Use of Estimates. The preparation of condensed consolidated financial statements in conformity with GAAP requires the Company’s management to make estimates and assumptions that affect the reported amounts of assets and liabilities. These estimates affect the disclosure of contingent assets and liabilities as of the date of the condensed consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recently Adopted Accounting Pronouncements. In July 2012, the FASB issued guidance on testing indefinite-lived intangible assets for impairment. The guidance allows an entity the option first to assess qualitative factors to determine whether the existence of events and circumstances indicates that it is more likely than not that the indefinite-lived intangible asset is impaired. If, after assessing the totality of events and circumstances, an entity concludes that it is not more likely than not that the indefinite-lived intangible asset is impaired, then the entity is not required to take further action. However, if an entity concludes otherwise, then it is required to determine the fair value of the indefinite-lived intangible asset and perform the quantitative impairment test by comparing the fair value with the carrying amount. This guidance was effective for the Company in the first quarter of fiscal 2013. The measurement provisions of this guidance did not impact our financial statements and all necessary disclosures have been complied within this Form 10-Q.

Effective December 31, 2012, the Company adopted Accounting Standards Update 2013-02, “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income.” The updated standard requires the reporting of reclassifications out of accumulated other comprehensive income (“AOCI”). We are required to present either on the face of the statement where net income is presented or in the notes to the financial statements significant amounts reclassified out of accumulated other comprehensive income (loss) by the respective line items of net income. For the first two quarters of 2013 and 2012, we did not have any significant amounts reclassified out of AOCI. All necessary disclosures have been complied within this Form 10-Q.

Long-term debt	—	74.4	—	72.8
Total liabilities at fair value	\$ —	\$ 75.7	\$ —	\$ 74.1

There were no transfers among levels within the fair value hierarchy during the twenty-eight weeks ended July 14, 2013 .

At July 14, 2013 and December 30, 2012 , the fair value of the Company's current assets and current liabilities approximates carrying value because of the short-term nature of these instruments.

The fair value of our interest rate swap is based on the sum of all future net present value cash flows. The future cash flows are derived based on the terms of our interest rate swap, as well as considering published discount factors, and projected London Interbank Offered Rates ("LIBOR"). The fair values of each of our long-term debt instruments are based on the amount of future cash flows associated with each instrument, discounted using our current borrowing rate for similar debt instruments of comparable maturity.

Long-term debt	\$ 62.1	\$ 66.8

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

2010 Credit Facility. On December 23, 2010, the Company entered into a bank credit facility (the “2010 Credit Facility”) with a group of lenders consisting of a 5 year \$60.0 million revolving credit facility and \$40.0 million term loan.

Under the terms of the revolving credit facility, the Company may obtain other short-term borrowings up to \$10.0 million and letters of credit up to \$25.0 million . Collectively, these other borrowings and letters of credit may not exceed the amount of unused borrowings under the 2010 Credit Facility. As of July 14, 2013 , the Company had \$0.4 million of outstanding letters of credit. Availability for short-term borrowings and letters of credit under the revolving credit facility was \$22.6 million .

As of July 14, 2013 , the Company was in compliance with the financial and other covenants of the 2010 Credit Facility. As of July 14, 2013 , the Company’s weighted average interest rate for all outstanding indebtedness under the 2010 Credit Facility was 3.7% .

Interest Rate Swap Agreements. On February 22, 2011, the Company entered into new interest rate swap agreements limiting the interest rate exposure on \$30.0 million of the term loan debt to a fixed rate of 4.8% . The term of the swap agreements expires March 31, 2015 .

The Company’s interest rate swap agreements are derivative instruments that are designated as cash flow hedges. The fair value gain or loss on the interest rate swaps is included as a component of the “Accumulated other comprehensive loss” (“AOCL”). The following tables summarize the fair value of the Company’s interest rate swap agreements and the effect on the financial statements:

Note 9 — Commitments and Contingencies

Litigation. The Company is a defendant in various legal proceedings arising in the ordinary course of business, including claims resulting from “slip and fall” accidents, employment-related claims, claims from guests or employees alleging illness, injury or other food quality, health or operational concerns and claims related to franchise matters. The Company establishes reserves to provide for the settlement of such matters when payment is probable and reasonably estimable. The Company’s management believes their ultimate resolution will not have a material adverse effect on the Company’s financial condition or its results of operations.

Insurance Programs. The Company carries property, general liability, business interruption, crime, directors and officers liability, employment practices liability, environmental and workers’ compensation insurance policies which it believes are customary for businesses of its size and type. Pursuant to the terms of their franchise agreements, the Company’s franchisees are also required to maintain certain types and levels of insurance coverage, including commercial general liability insurance, workers’ compensation insurance, all risk property and automobile insurance.

The Company has established reserves with respect to the programs described above based on the estimated total losses the Company will experience. At July 14, 2013, the Company’s insurance reserves of approximately \$0.2 million were collateralized by letters of credit and/or cash deposits of \$0.5 million.

Interest expense, net	\$ 0.9	\$ 0.9	\$ 2.0	\$ 2.0

Note 11 — Income Taxes

The Company’s effective tax rates were 37.5% and 37.1% for the twelve week periods ended July 14, 2013 and July 8, 2012, respectively. The Company’s effective tax rate was 36.9% for the twenty-eight week periods ended July 14, 2013 and July 8, 2012. The effective tax rates differ from statutory rates due to adjustments to estimated tax reserves, tax credits and permanent differences between reported income and taxable income for tax purposes.

As of July 14, 2013 and December 30, 2012, the amount of unrecognized tax benefits was approximately \$1.3 million, of which approximately \$0.2 million, if recognized, would affect the effective income tax rate.

The Company files income tax returns in the United States and various state jurisdictions. The U.S. federal tax years 2010 and 2011 are open to audit. In general, the state tax years open to audit range from 2008 through 2011.

Note 12 — Components of Earnings Per Common Share Computation

The Company’s basic earnings per share calculation is computed based on the weighted-average number of common shares outstanding. Diluted earnings per share calculation is computed based on the weighted-average number of common shares outstanding adjusted by the number of additional shares that would have been outstanding had the potentially dilutive common shares been issued. Potentially dilutive common shares include employee stock options, non-vested restricted stock awards and non-vested restricted share units. Performance based awards are included in the average diluted shares outstanding each period if the performance criteria have been met at the end of the respective periods.

Notes to Unaudited Condensed Consolidated Financial Statements (continued)

Potentially dilutive shares are excluded from the diluted earnings per share computation in periods in which they have an anti-dilutive effect. During the twelve and twenty-eight week periods ended July 14, 2013, approximately 0.1 million stock options were not included in the computation of diluted earnings per share. There were no potentially dilutive shares excluded from the computation of diluted earnings per share for the twelve and twenty-eight week periods ended July 8, 2012.

Note 13 — Segment Information

Based on its internal reporting and management structure, the Company has determined that it has two reportable segments: franchise operations and company-operated restaurants. The company-operated restaurant segment derives its revenues from the operation of company owned restaurants. The franchise segment consists of domestic and international franchising activities and derives its revenues principally from (1) ongoing royalty payments that are determined based on a percentage of franchisee sales; (2) franchise fees associated with new restaurant openings; (3) development fees associated with the opening of new franchised restaurants in a given market; and (4) rental income associated with properties leased or subleased to franchisees. Operating profit for each reportable segment includes operating results directly allocable to each segment plus a 5% inter-company royalty charge from franchise operations to company-operated restaurants.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis for AFC Enterprises, Inc. (“AFC” or the “Company”) should be read in conjunction with our condensed consolidated financial statements included in Part 1, Item 1 of this quarterly report and in conjunction with the Company’s Annual Report on Form10-K for the fiscal year ended December 30, 2012 (the “ 2012 Form 10-K”).

Nature of Business

We develop, operate and franchise quick-service restaurants (“QSRs”) under the trade names Popeyes® Chicken & Biscuits and Popeyes® Louisiana Kitchen (collectively “Popeyes”). The Company operates two business segments: franchise operations and company-operated restaurants.

As of July 14, 2013 , we operated and franchised 2,153 Popeyes restaurants in 47 states, three territories, and 28 foreign countries.

Total Operating Restaurants as of:	7/14/2013	12/30/2012
Domestic restaurants:		
Company-Operated	47	45
Franchised	1,674	1,634
International restaurants:		
Franchised	432	425
Total	2,153	2,104

Our Business Strategy

The Company continues to strengthen its competitive position in the restaurant industry and quick service restaurant sector by executing its Strategic Plan which is based on the following pillars:

- **Build a Distinctive Brand**
 - In the second quarter, Popeyes promoted Three of Kind - three different configurations of our Bonafide® bone-in chicken and Handcrafted Tenders, each for \$3.99. We also featured Garlic Pepper Wicked Chicken and reprised Zatarain's® Butterfly Shrimp.
 - This was Popeyes' 13th consecutive quarter of positive same-store sales. According to independent industry research, Popeyes has outpaced the same-store sales of the entire Chicken-QSR category for 21 consecutive quarters and the same-store sales of the overall QSR category for seven consecutive quarters.

- **Run Great Restaurants**
 - As of the end of the second quarter, approximately 40% of the domestic system was in the new Popeyes Louisiana Kitchen image. The Company expects approximately 60% of the domestic system to be in the new image by the end of 2013. On average, reimaged restaurants are enjoying a 3% to 4% sales lift.
 - At the end of the second quarter, approximately 70% of the domestic system restaurants attained speed of service below our 180 second standard.
 - The Company's Guest Experience Monitor, or GEM, percent delighted scores were approximately 61% at the end of the second quarter.

- **Grow Restaurant Profits**
 - Average restaurant operating profit before rent of Popeyes domestic freestanding franchised restaurants increased to 22.2% of total revenues for the first quarter, compared to 21.8% in the first quarter of 2012.
 - Commodity prices were flat for the second quarter versus year ago, and up 1.2% through the end of the second quarter. For full year 2013, we expect commodity costs to be down slightly versus the prior year.

- **Accelerate Quality Restaurant Openings**
 - The Company further expanded its presence in Indianapolis, IN with the opening of two restaurants. The average annualized sales volumes of our restaurants in this market are significantly out-performing the domestic system average of \$1.2 million.

Table of Contents

- In the second quarter, we converted and franchised eight of the 26 restaurants acquired in 2012 in Minnesota and California. One-time franchisee fees of approximately \$1.8 million were recognized in the second quarter as franchising of these restaurants was completed. We have converted 13 of the 26 acquired restaurants and the remaining 13 acquired restaurants are expected to be converted at a steady pace over the balance of 2013.
- Create a Culture of Servant Leaders
 - We place great emphasis on our human capital and its proven impact on our guest experience and the sustained long term performance of our Company.
 - In 2013, we are defining the critical elements that will become Popeyes distinctive employee and guest experiences. We are also building the disciplines, tools and processes needed for in-market testing followed by a system launch.

Management Overview of Second Quarter 2013 Operating Results

Our second quarter of 2013 results and highlights include the following:

- Reported net income was \$8.5 million, or \$0.35 per diluted share, compared to \$6.6 million, or \$0.27 per diluted share last year. Through the end of the second quarter, adjusted earnings per diluted share were \$0.75 compared to \$0.62 last year, an increase of 21%. Adjusted earnings per diluted share is a supplemental non-GAAP measure of performance. See the heading entitled “Management’s Use of Non-GAAP Financial Measures.”
- Global same-store sales increased 4.4% compared to 7.5% last year. Year-to-date through the end of the second quarter, global same-store sales were 4.5% compared to a 7.5% increase in the prior year, for a two year same-store sales growth of 12%.
- Global system-wide sales increased 11.6% compared to an 11.5% increase last year.
- The Popeyes system opened 44 restaurants and closed 16 restaurants, resulting in 28 net openings compared to 9 in the prior year. Through the end of the second quarter, the Popeyes system had opened 84 and closed 40 restaurants, for net restaurant openings of 44 compared to 18 last year.
- Through the end of the second quarter, Operating EBITDA was \$34.1 million at 31.5% of total revenues, compared to \$28.6 million at 31.0% of total revenues in 2012. The 50 basis point increase was primarily a result of strong same-store sales, franchise fees associated with the conversion of the restaurants in Minneapolis and California acquired in 2012 and higher restaurant operating profit at Company-operated restaurants. The Company’s Operating EBITDA margin remains among the highest in the QSR industry. Operating EBITDA is a supplemental non-GAAP measure of performance. See the heading entitled “Management’s Use of Non-GAAP Financial Measures.”
- As a result of strong revenue and operating profit, Free cash flow through the end of the second quarter was \$21.8 million compared to \$18.2 million last year. Free cash flow is a supplemental non-GAAP measure of performance. See the heading entitled “Management’s Use of Non-GAAP Financial Measures.”

(a) Franchise revenues are principally comprised of royalty payments from franchisees that are based upon franchisee sales. While franchisee sales are not recorded as revenue by the Company, we believe they are important in understanding the Company's financial performance and overall financial health, given the Company's strategic focus on growing its overall business through franchising. For the second quarter of 2013 and 2012, franchisee sales, as reported by our franchisees, were approximately \$554.0 million and \$497.6 million, respectively. For the twenty-eight weeks ended July 14, 2013 and July 8, 2012, franchisee sales, as reported by our franchisees, were approximately \$1,260.6 million and \$1,140.9 million, respectively.

(b) Same-store sales statistics exclude temporarily and permanently closed restaurants and stores that have been open for less than 65 weeks.

2013 Same-Store Sales — Second Quarter

Global same-store sales increased 4.4% compared to a 7.5% increase in 2012, for a two-year growth of 11.9%. Total domestic same-store sales increased 4.3% compared to an 8.4% increase last year for a two-year growth of 12.7%. According to independent data, in the second quarter of 2013, Popeyes same-store sales outpaced the Chicken-QSR category for the 21th consecutive quarter

Table of Contents

and the QSR category for the 7th consecutive quarter. International same-store sales increased 5.8% and represented the 14th consecutive quarter of positive same-store sales growth. Second quarter two-year international same-store sales growth was 6.7% .

Looking Forward to the Remainder of 2013

Given the strong sales performance in the first and second quarters, we are increasing our expectation of global same-store sales growth to 3.5% to 4.5% compared to previous guidance of the upper end of 3% to 4%.

We are also increasing our expectation of full year general and administrative expenses to \$73 to \$75 million compared to our previous guidance of \$72 to \$74 million. As a percentage of system-wide sales, general and administrative expenses remain at approximately 3.0%, among the lowest in the industry.

As a result of new company restaurant development in the first half of 2013 and our pipeline, we now expect to open between 8 and 10 total new company restaurants this year, compared to previous guidance of 6 to 10.

The Company reiterates the following guidance for fiscal 2013:

- New restaurant openings in the range of 175 to 195 restaurants, and net restaurant openings in the range of 85 to 115. Included in 2013 total openings are approximately 60 international restaurants.
- Capital expenditures of \$24 to \$28 million, including the conversion of restaurants acquired in 2012 in Minnesota and California.
- An expected effective income tax rate in 2013 of 37% compared to 36.3% in 2012.
- The Company plans to repurchase approximately \$15 to \$20 million in outstanding shares, compared to \$15.2 million of share repurchases in 2012.

The Company also reiterates adjusted earnings per diluted share to be at the upper end of \$1.37 to \$1.42 for fiscal 2013.

Comparisons of the Second Quarter for 2013 and 2012

Sales by Company-operated Restaurants

Sales by Company-operated restaurants were \$17.5 million in the second quarter of 2013 , a \$3.2 million increase from the second quarter of 2012 . The increase was primarily due to a same–store sales increase of 1.7%, five new restaurant openings in 2012 and two net openings in 2013 .

Franchise Revenues

Franchise revenues have three basic components: (1) royalties that are based on a percentage (typically 5%) of franchisee sales; (2) franchise fees associated with new unit openings and renewals; and (3) development fees associated with the agreement pursuant to which a franchisee may develop new restaurants in a given market. Royalties are the largest component of franchise revenues, generally constituting more than 90% of franchise revenues.

Franchise revenues were \$29.1 million in the second quarter of 2013 , a \$4.8 million increase from the second quarter of 2012 . The increase was primarily due to a \$2.6 million increase in royalty revenue from positive same-store sales and new franchised restaurants, \$1.8 million in one-time franchise fees associated with the conversion and franchising of eight California and Minnesota restaurant properties acquired in 2012 and a \$0.4 million increase in other franchise revenues, net.

Company-operated Restaurant Operating Profit

Company-operated restaurant operating profit (“ROP”) was \$3.2 million , or 18.3% of sales, compared to \$2.5 million , or 17.5% of sales last year. The \$0.7 million increase in ROP was primarily due to higher revenues resulting from positive same-store sales and new restaurant openings and an improvement in food cost margins. Company-operated restaurant operating profit margins is a supplemental non-GAAP measure of performance. See the heading entitled “Management’s Use of Non-GAAP Financial Measures.”

Table of Contents

General and Administrative Expenses

General and administrative expenses were \$16.8 million , or 2.9% of system-wide sales, compared to \$14.6 million , or 2.9% of system-wide sales last year.

The \$2.2 million increase in general and administrative expenses was primarily attributable to a:

- \$0.6 million increase in domestic franchisee restaurant support services and assessments,
- \$0.4 million increase in international franchise development and marketing support expenses,
- \$0.4 million increase in performance-based incentive compensation expense,
- \$0.4 million increase in legal and corporate administrative expenses, and
- \$0.4 million increase in marketing, supply chain and other expenses, net.

Depreciation and amortization

Depreciation and amortization was \$1.5 million compared to \$1.1 million last year. The increase in depreciation and amortization is primarily attributable to depreciation associated with new company-operated restaurants, restaurant reimages, acquired restaurant properties converted and leased to franchisees in Minnesota and California, information technology assets and our corporate support center facility.

Operating Profit

Operating profit was \$14.5 million , a \$3.1 million increase compared to 2012 . The following is an analysis of the fluctuations in operating profit by business segment. Operating profit for each reportable segment includes operating results directly attributable to each segment plus a 5% inter-company royalty charge from franchise operations to company-operated restaurants.

(Dollars in millions)	12 Weeks Ended		Fluctuation	As a Percent
	7/14/2013	7/8/2012		
Franchise operations	\$ 14.5	\$ 11.3	\$ 3.2	28.3 %
Company-operated restaurants	1.5	1.3	0.2	15.4 %
Operating profit before unallocated expenses	16.0	12.6	3.4	27.0 %
Less unallocated expenses:				
Depreciation and amortization	1.5	1.1	0.4	36.4 %
Other expenses (income), net	—	0.1	(0.1)	(100.0)%
Operating profit	\$ 14.5	\$ 11.4	\$ 3.1	27.2 %

The \$3.2 million growth in franchise operations was primarily due to the \$4.8 million increase in franchise revenue partially offset by increases in general and administrative expenses related to domestic franchisee restaurant support services and assessments, international franchise development and marketing expenses, long-term incentive stock-based compensation expense and other general and administrative expenses, net.

Company-operated restaurants segment operating profit was \$1.5 million , a \$0.2 million or 15.4% increase from 2012. The increase in company-operated restaurants segment operating profit was attributable to a \$0.7 million increase in restaurant operating profit partially offset by higher multi-unit management expenses in new company-operated restaurant markets Indianapolis and Charlotte, inter-company royalties and other general and administrative expenses, net.

Income Tax Expense

Income tax expense was \$5.1 million at an effective tax rate of 37.5% , compared to an effective tax rate of 37.1% in 2012 . The effective tax rates differ from statutory rates due to adjustments to estimated tax reserves, tax credits and permanent differences between reported income and taxable income for tax purposes.

Comparisons of the Twenty-Eight Weeks Ended July 14, 2013 and July 8, 2012

Sales by Company-operated Restaurants

Sales by Company-operated restaurants were \$41.4 million in the twenty-eight weeks ended July 14, 2013 , a \$7.3 million increase from 2012 . The increase was primarily due to a same-store sales increase of 2.5%, five new restaurant openings in 2012 and two net openings in 2013 .

Franchise Revenues

Franchise revenues were \$64.3 million in the twenty-eight weeks ended July 14, 2013 , a \$8.3 million increase from 2012 . The increase was primarily due to a \$5.6 million increase in royalty revenue from positive same-store sales and new franchised restaurants and \$2.5 million in one-time franchise fees associated with the conversion and franchising of eleven California and Minnesota restaurant properties acquired in 2012 and a \$0.2 million increase in other franchise revenues, net.

Company-operated Restaurant Operating Profit

Company-operated restaurant operating profit ("ROP") was \$7.9 million in the twenty-eight weeks ended July 14, 2013 , or 19.1% of sales, compared to \$6.3 million , or 18.5% of sales, last year. The \$1.6 million increase in ROP was primarily due to higher revenues resulting from positive same-store sales and new restaurant openings and an improvement in food cost margins. Company-operated restaurant operating profit margins is a supplemental non-GAAP measure of performance. See the heading entitled "Management's Use of Non-GAAP Financial Measures."

General and Administrative Expenses

General and administrative expenses were \$38.8 million in the twenty-eight weeks ended July 14, 2013 , or 3.0% of system-wide sales, compared to \$35.0 million , or 3.1% of system-wide sales, last year.

The \$3.8 million increase in general and administrative expenses was primarily attributable to a:

- \$1.2 million increase in international franchise development and marketing support expenses,
- \$0.6 million increase in domestic franchisee restaurant support services and assessments,
- \$0.5 million in marketing and menu development expenses,
- \$0.5 million in multi-unit management expenses in new Company-operated restaurant markets in Indianapolis and Charlotte,
- \$0.4 million increase in performance-based incentive compensation expense, and
- \$0.6 million increase in leadership development and other expenses, net.

Depreciation and amortization

Depreciation and amortization was \$3.3 million compared to \$2.4 million last year. The increase in depreciation and amortization is primarily attributable to depreciation associated with new company-operated restaurants, restaurant reimages, acquired restaurant properties converted and leased to franchisees in Minnesota and California, information technology assets and our corporate support center facility.

Operating Profit

Operating profit was \$30.7 million , a \$5.1 million increase compared to 2012 . The following is an analysis of the fluctuations in operating profit by business segment. Operating profit for each reportable segment includes operating results directly attributable to each segment plus a 5% inter-company royalty charge from franchise operations to company-operated restaurants.

(Dollars in millions)	28 weeks ended		Fluctuation	As a Percent
	7/14/13	7/8/12		
Franchise operations	\$ 30.3	\$ 25.1	\$ 5.2	20.7%

Other expenses (income), net	0.1	0.1	—	—%
Operating profit	\$ 30.7	\$ 25.6	\$ 5.1	19.9%

The \$5.2 million growth in franchise operations was primarily due to the \$8.3 million increase in franchise revenue partially offset by increases in general and administrative expenses related to international franchise development and marketing expenses, domestic franchisee restaurant support services and assessments, marketing and menu development expenses, long-term incentive stock-based compensation expense and leadership development and other general and administrative expenses, net.

Company-operated restaurants segment operating profit was \$3.8 million , a \$0.8 million or 26.7% increase from 2012 . The increase in company-operated restaurants segment operating profit was attributable to a \$1.6 million increase in restaurant operating profit partially offset by higher multi-unit management expenses in new company-operated restaurant markets Indianapolis and Charlotte, inter-company royalties and other general and administrative expenses, net.

Income Tax Expense

Income tax expense was \$10.6 million , at an effective rate of 36.9% for the twenty-eight week periods ended July 14, 2013 and July 8, 2012 . The effective tax rates differ from statutory rates due to adjustments to estimated tax reserves, tax credits and permanent differences between reported income and taxable income for tax purposes.

Liquidity and Capital Resources

We finance our business activities primarily with:

- cash flows generated from our operating activities, and
- borrowings under our 2010 Credit Facility.

Our franchise model provides diverse and reliable cash flows. Net cash provided by operating activities of the Company was \$23.5 million and \$16.2 million for the twenty-eight week periods ended July 14, 2013 and July 8, 2012 , respectively. See our condensed consolidated statements of cash flows in Part 1, Item 1 to this quarterly report. Based primarily upon our generation of cash flow from operations, our existing cash reserves (approximately \$15.2 million available as of July 14, 2013), and available borrowings under our 2010 Credit Facility (approximately \$22.6 million available as of July 14, 2013), we believe that we will have adequate cash flow to meet our anticipated future requirements for working capital, including various contractual obligations and expected capital expenditures.

Our cash flows and available borrowings allow us to pursue our growth strategies. Our priorities in the use of available cash are:

- reinvestment in our core business activities that promote the Company’s strategic initiatives,
- repurchase shares of our common stock, and
- reduction of long-term debt.

Our investment in core business activities includes our obligation to maintain our company-operated restaurants and provide marketing plans and operations support to our franchise system.

Under the terms of the Company’s 2010 Credit Facility, quarterly principal payments of \$1.5 million will be due during 2013 and 2014, and \$4.5 million during 2015.

Table of Contents

Pursuant to the 2010 Credit Facility, the Company is subject to a Total Leverage Ratio requirement of 2.75 to 1.0 through December 23, 2015. As of July 14, 2013, the Company's Total Leverage Ratio was 1.03 to 1.0. The Total Leverage Ratio is defined as the ratio of the Company's Consolidated Total Indebtedness to Consolidated EBITDA for the four immediately preceding fiscal quarters. Consolidated Total Indebtedness means, as at any date of determination, the aggregate principal amount of Indebtedness of the Company and its Subsidiaries.

The Company repurchased 96,028 shares of our common stock for approximately \$3.4 million during the second quarter of 2013. Through the end of the second quarter year to date, the Company has used \$ 8.4 million to repurchase and retire approximately 234,000 shares of its common stock. As of July 14, 2013, the remaining value of shares that may be repurchased under the Company's current share repurchase program was approximately \$43.0 million. Under the terms of the 2010 Credit Facility, the Company may repurchase and retire its common shares at any time its Total Leverage Ratio is less than 2.00 to 1.

Critical Accounting Policies and Significant Estimates

There have been no material changes to the Company's critical accounting policies and estimates from the information provided in Item 7, "Management's Discussion and Analysis of Financial Condition and Results of Operations", included in the 2012 Form 10-K.

Contractual Obligations

The Company's material contractual obligations are summarized and included in our 2012 Form 10-K. During the twenty-eight weeks ended July 14, 2013, there have been no material changes outside the ordinary course of business in the contractual obligations specified in the 2012 Form 10-K.

Long-Term Debt

For a discussion of our long-term debt, see Note 5 to our condensed consolidated financial statements at Part 1, Item 1 to this quarterly report. That note is hereby incorporated by reference into this Item 2. See Note 9 in the 2012 Form 10-K for more information about the Company's long-term debt.

Capital Expenditures

Our capital expenditures consist of new unit construction and development, equipment replacements, the purchase of new equipment, reimagining our company-operated restaurants and investments in information technology hardware and software. Substantially all of our capital expenditures have been financed using cash provided from operating activities and borrowings under our 2010 Credit Facility.

During the twenty-eight weeks ended July 14, 2013, we invested approximately \$15.8 million in various capital projects, comprised of \$6.1 million for the conversion of restaurants in California and Minnesota, \$7.2 million for the construction of new restaurants, \$0.7 million for information technology hardware and software, \$1.2 million for reimagining activities at company restaurants, and \$0.6 million in other capital assets supporting the Company's growth strategies.

During the twenty-eight week period ended July 8, 2012, we invested approximately \$1.9 million in various capital projects, including approximately \$1.4 million in company restaurant reimages and construction, \$0.4 million of IT projects and \$0.1 million in other capital assets to maintain, replace and extend the lives of company-operated restaurant facilities and equipment.

Impact of Inflation

The impact of inflation on the cost of food, labor, fuel and energy costs, and other commodities has impacted our operating expenses. To the extent permitted by the competitive environment in which we operate, increased costs are partially recovered through menu price increases coupled with purchasing prices and productivity improvements.

Recently Adopted Accounting Pronouncements

For a discussion of recently adopted accounting pronouncements, see Note 2 to our condensed consolidated financial statements at Part 1, Item 1 to this quarterly report.

Accounting Pronouncements That We Have Not Yet Adopted

Accounting standards that have been issued by the FASB or other standards-setting bodies that do not require adoption until a future date are expected to have an immaterial impact on the financial statements upon adoption.

Management’s Use of Non-GAAP Financial Measures

Adjusted earnings per diluted share, Operating EBITDA, Company-operated restaurant operating profit and Free cash flow are supplemental non-GAAP financial measures. The Company uses Adjusted earnings per diluted share, Operating EBITDA, Company-operated restaurant operating profit and Free cash flow, in addition to net income, operating profit and cash flows from operating activities to assess its performance and believes it is important for investors to be able to evaluate the Company using the same measures used by management. The Company believes these measures are important indicators of its operational strength and the performance of its business. Adjusted earnings per diluted share, Operating EBITDA, Company-operated restaurant operating profit and Free cash flow as calculated by the Company are not necessarily comparable to similarly titled measures reported by other companies. In addition, Adjusted earnings per diluted share, Operating EBITDA, Company-operated restaurant operating profit and Free cash flow: (a) do not represent net income, cash flows from operations or earnings per share as defined by GAAP; (b) are not necessarily indicative of cash available to fund cash flow needs; and (c) should not be considered as an alternative to net income, earnings per share, operating profit, cash flows from operating activities or other financial information determined under GAAP.

Adjusted earnings per diluted share: Calculation and Definition

The Company defines adjusted earnings for the periods presented as the Company’s reported net income after adjusting for certain non-operating items consisting of the following:

- (i) other expense (income), net, as follows:
 - second quarter and year-to-date 2013 and 2012 are comprised of asset write downs offset by gain on the sale of assets;
 - fiscal 2012 includes \$0.9 million in gains on sale of real estate assets to franchisees, partially offset by \$0.3 million of asset write downs and \$0.1 million of hurricane-related expenses, net;
- (ii) for second quarter 2012 year-to-date approximately \$0.5 million in legal fees related to licensing arrangements; and
- (iii) the tax effect of these adjustments at the effective statutory rates.

Adjusted earnings per diluted share provides the per share effect of adjusted earnings on a diluted basis. The following table reconciles on a historical basis for second quarter 2013 , second quarter 2012 , second quarter year-to-date 2013, second quarter year-to-date 2012 and fiscal year 2012 , the Company’s Adjusted earnings per diluted share on a consolidated basis to the line on its Condensed Consolidated Statements of Operations entitled Net income, which the Company believes is the most directly comparable GAAP measure on its Condensed Consolidated Statements of Operations.

Forward-Looking Statements

This quarterly report on Form 10-Q contains "forward-looking statements" within the meaning of the federal securities laws. Statements regarding future events and developments and our future performance, as well as management's current expectations, beliefs, plans, estimates or projections relating to the future, are forward-looking statements within the meaning of these laws. These forward-looking statements are subject to a number of risks and uncertainties. Examples of such statements in this quarterly report on Form 10-Q include discussions regarding the Company's planned implementation of its strategic plan, planned share repurchases, projections and expectations regarding same-store sales for fiscal 2013 and beyond, expectations regarding future growth and commodity costs, expectations regarding restaurant reimagining, guidance for new restaurant openings and closures, effective income tax rate, and the Company's anticipated 2013 and long-term performance, including projections regarding general and administrative expenses, capital expenditures, and adjusted earnings per diluted share, and similar statements of belief or expectation regarding future events. Among the important factors that could cause actual results to differ materially from those indicated by such forward-looking statements are: competition from other restaurant concepts and food retailers, continued disruptions in the financial markets, the loss of franchisees and other business partners, labor shortages or increased labor costs, increased costs of our principal food products, changes in consumer preferences and demographic trends, as well as concerns about health or food quality, instances of avian flu or other food-borne illnesses, general economic conditions, the loss of senior management and the inability to attract and retain additional qualified management personnel, limitations on our business under our 2010 Credit Facility, our ability to comply with the repayment requirements, covenants, tests and restrictions contained in our 2010 Credit Facility, failure of our franchisees, a decline in the number of franchised units, a decline in our ability to franchise new units, slowed expansion into new markets, unexpected and adverse fluctuations in quarterly results, increased government regulation, effects of volatile gasoline prices, supply and delivery shortages or interruptions, currency, economic and political factors that affect our international operations, inadequate protection of our intellectual property and liabilities for environmental contamination and the other risk factors detailed in the Company's 2012 Annual Report on Form 10-K and other documents we file with the Securities and Exchange Commission. Therefore, you should not place undue reliance on any forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Commodity Market Risk. We are exposed to market risk from changes in poultry and other commodity prices. Chicken is the principal raw material for our Popeyes operations, constituting approximately 40% of our combined “Restaurant food, beverages and packaging” costs. Food costs are significantly affected by increases in the cost of chicken, which can result from a number of factors, including increases in the cost of corn and soy, disease, declining market supply of fast-food sized chickens and other factors that affect availability. Restaurant food, beverages and packaging costs are further affected by increases in the cost of other commodities including shortening, wheat, gas and utility price fluctuations. Our ability to recover increased costs through higher pricing is limited by the competitive environment in which we operate.

In order to ensure favorable pricing for fresh chicken purchases and to maintain an adequate supply of fresh chicken for the Popeyes system, Supply Management Services, Inc. (a not-for-profit purchasing cooperative of which we are a member) has entered into chicken pricing contracts with chicken suppliers. The contracts, which pertain to a vast majority of our system-wide purchases for Popeyes, are “cost-plus” contracts that utilize prices based upon the cost of feed grains plus certain agreed upon non-feed and processing costs. In order to stabilize pricing for the Popeyes system, Supply Management Services, Inc. has entered into commodity pricing agreements for 2013 for certain commodities including corn and soy, which impact the price of poultry and other food cost.

Instances of food-borne illness or avian flu could adversely affect the price and availability of poultry. In addition to losses associated with higher prices and a lower supply of our food ingredients, instances of food-borne illnesses could result in negative publicity for us and could result in a decline in our sales.

Foreign Currency Exchange Rate Risk. We are exposed to foreign currency exchange rate risk associated with our international franchise operations. Foreign currency exchange rate changes directly impact our revenues and cash flows from these operations. For the twenty-eight weeks ended July 14, 2013 and July 8, 2012, foreign currency revenues represented approximately 4.4% and 4.5%, respectively, of our total revenues. All other things being equal, for the twenty-eight weeks ended July 14, 2013, operating profit would have decreased by approximately \$0.5 million if all foreign currencies uniformly weakened 10% relative to the U.S. dollar.

As of July 14, 2013, approximately \$1.1 million of our accounts receivable were denominated in foreign currencies. Our international franchised operations are in 28 foreign countries with approximately 45% of our revenues from international royalties originating from restaurants in Korea, Canada and Turkey.

Interest Rate Risk With Respect to our 2010 Credit Facility. We have a market risk exposure to changes in interest rates. Borrowings made pursuant to the 2010 Credit Facility include interest rates that are benchmarked to U.S. and European short-term floating-rate interest rates. As of July 14, 2013, we had outstanding borrowings under our 2010 Credit Facility of \$64.0 million.

On February 22, 2011, the Company entered into new interest rate swap agreements limiting the interest rate exposure on \$30.0 million of the term loan debt to a fixed rate of 4.8%. The term of the swap agreements expires March 31, 2015.

As of July 14, 2013, the Company’s weighted average interest rate for all outstanding indebtedness under the 2010 Credit Facility, including the effect of the interest rate swap agreements, was approximately 3.7%. The impact on our annual results of operations of a hypothetical one-point interest rate change on the outstanding borrowings under the 2010 Credit Facility would be approximately \$0.3 million, taking into account our interest rate swap agreements.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures

Disclosure controls and procedures are controls and other procedures of a registrant designed to ensure that information required to be disclosed by the registrant in the reports that it files or submits under the Securities Exchange Act of 1934 (the “Exchange Act”) are properly recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission’s (“SEC”) rules and forms. Disclosure controls and procedures include processes to accumulate and evaluate relevant information and communicate such information to a registrant’s management, including its principal executive and financial officers, as appropriate, to allow for timely decisions regarding required disclosures.

(b) CEO and CFO Certifications

Attached as Exhibit 31.1 and 31.2 to this quarterly report are certifications by our Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”). These certifications are required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002. This portion of our quarterly report describes the results of our controls evaluation referred to in those certifications.

(c) Our Evaluation of AFC’s Disclosure Controls and Procedures

As of the end of the period covered by this report, we evaluated the effectiveness of the design and operation of AFC’s disclosure controls and procedures, as required by Rule 13a-15 of the Exchange Act. This evaluation was carried out under the supervision and with the participation of our management, including our CEO and CFO. Based on the evaluation as of the end of the period covered by this report, our CEO and CFO concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms.

(d) Changes in Internal Control Over Financial Reporting

There were no changes to our internal control over financial reporting or in other factors that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting during the twelve week period ended July 14, 2013 covered by this report.

(e) Inherent Limitations of Any Control System

We do not expect that our disclosure controls and procedures or our internal control over financial reporting will prevent all error and all fraud. A control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the control system’s objectives will be met. However, the control system has been designed to provide reasonable assurance of the control objectives are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected.
