NOTE: Sums may not equal total due to rounding

1) Certain reclassifications have been made to prior period amounts to conform to the current period presentation.

2) "Compensation accrual adjustments" represents the adjustment that would be necessary in a given period to present the performance compensation actually accrued for that period against the performance compensation as if it had been accrued at 100% of the target performance compensation levels.

3) "Pro forma operating expenses" is a supplemental non-GAAP financial measure that InterDigital believes provides relevant and useful information to investors and other users of our financial data in evaluating the effectiveness of our operations and underlying business trends. A limitation of "Pro forma operating expenses" is that it does not represent the total increase or decrease in InterDigital's total operating expenses for the period. "Pro forma operating expenses" excludes from total operating expense significant items that are non-operational or non-recurring in nature, including "Compensation accrual adjustments" (see Footnote 2). InterDigital's computation of "Pro forma operating expenses" might not be comparable to the "Pro forma operating expenses" reported by other companies. The presentation of this financial information, which is not prepared under any comprehensive set of accounting rules or principles, is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with generally accepted accounting principles ("GAAP"). A detailed reconciliation of "Pro forma operating expenses" to total operating expenses, the most directly comparable GAAP financial measure, is provided above.

4) Non-GAAP net income and non-GAAP diluted EPS are supplemental non-GAAP financial measures that InterDigital believes provides investors with important insight into the Company's ongoing business performance. A limitation of the utility of non-GAAP net income and non-GAAP diluted EPS is that they do not represent the total net income and diluted EPS of the company for the period. InterDigital defines non-GAAP net income as net income plus share-based compensation, repositioning costs, impairment charges and one time adjustments, non-cash interest expense on the company's outstanding convertible debt, the related income tax effect of the preceding items, and adjustments to income taxes. The presentation of this financial information, which is not prepared under any comprehensive set of accounting rules or principles, is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with generally accepted accounting principles ("GAAP"). These non-GAAP financial measures used by the company may be calculated differently from, and therefore may not be comparable to, similarly titled measures used by other companies. Detailed reconciliations of non-GAAP net income to net income and non-GAAP diluted EPS to net income (loss) per common share - diluted, or diluted EPS, the most directly comparable GAAP financial measures, are provided above.

5) "Free cash flow" is a supplemental non-GAAP financial measure that InterDigital believes is helpful in evaluating the company's ability to invest in its business, make strategic acquisitions and fund share repurchases, among other things. A limitation of the utility of free cash flow as a measure of financial performance is that it does not represent the total increase or decrease in the company's cash balance for the period. InterDigital defines "free cash flow" as net cash provided by/(used in) operating activities less purchases of property and equipment, technology licenses and investments in patents. InterDigital's computation of free cash flow might not be comparable to free cash flow reported by other companies. The presentation of this financial information, which is not prepared under any comprehensive set of accounting rules or principles, is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with generally accepted accounting principles ("GAAP"). A detailed reconciliation of free cash flow to net cash provided by / (used in) operating activities, the most directly comparable GAAP financial measure, is provided above.
