### Special Note Regarding Forward-Looking Statement

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements contained in this Quarterly Report on Form 10-Q, other than statements of historical fact, are forward-looking statements. Forward-looking statements generally can be identified by the words “may,” “will,” “expect,” “believe,” “anticipate,” “intend,” “could,” “estimate,” or “continue,” and similar expressions. We have based these forward-looking statements largely on our current expectations and projections about future events, as well as trends that we believe may affect our financial condition, results of operations, business strategy, short-term and long-term business operations and objectives, and financial needs. These statements include, among other things:

- our expectations regarding revenue, costs and expenses;
- our plans regarding investing in our content delivery network, as well as other products and technologies;
- our beliefs regarding the growth of, and competition within, the content delivery industry;
- our beliefs regarding the growth of our business and how that impacts our liquidity and capital resources requirements;
- the impact of certain new accounting standards and guidance;
- our plans with respect to investments in marketable securities;
- our expectations regarding litigation and other pending or potential disputes;
- our estimations regarding taxes and belief regarding our tax reserves;
- our beliefs regarding the use of Non-GAAP financial measures;
- our approach to identifying, attracting and keeping new and existing customers, as well as our expectations regarding customer turnover;
- the sufficiency of our sources of funding;
- our belief regarding our interest rate risk;
- our beliefs regarding inflation risks;
- our beliefs regarding expense and productivity of and competition for our sales force; and
- our beliefs regarding the significance of our large customers.

These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described under the caption “Risk Factors” in Part II, Item 1A in this Quarterly Report on Form 10-Q and those discussed in other documents we file with the Securities and Exchange Commission (SEC).

In addition, we operate in a very competitive and rapidly changing environment. New risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the future events and trends discussed in this Quarterly Report on Form 10-Q may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

The forward-looking statements contained herein are based on our current expectations and assumptions and on information available as of the date of the filing of this Quarterly Report on Form 10-Q. We undertake no obligation to revise or publicly release the results of any revision to these forward-looking statements, except as required by law. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

Unless expressly indicated or the context requires otherwise, the terms “Limelight,” “we,” “us,” and “our” in this document refer to Limelight Networks, Inc., a Delaware corporation, and, where appropriate, its wholly owned subsidiaries. All information is presented in thousands, except per share amounts, customer count and where specifically noted.

*The accompanying notes are an integral part of the consolidated financial statements.*

**Limelight Networks, Inc.**  
**Notes to Unaudited Consolidated Financial Statements**  
**March 31, 2016**

**1. Nature of Business**

Limelight operates a globally distributed, high-performance network and provides a suite of integrated services marketed under the Orchestrate Platform which include content delivery, video content management, website and web application acceleration, website and content security, and cloud storage services.

We were incorporated in Delaware in 2003, and have operated in the Phoenix metropolitan area since 2001 and elsewhere throughout the United States since 2003. We began international operations in 2004.

**2. Summary of Significant Accounting Policies**

***Basis of Presentation***

The accompanying unaudited interim consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission. They do not include all of the information and footnotes required by U.S. generally accepted accounting principles (U.S. GAAP) for complete financial statements. Such interim financial information is unaudited but reflects all adjustments that are, in the opinion of management, necessary for the fair presentation of the interim periods presented and of a normal recurring nature. The results of operations presented in this quarterly report on Form 10-Q are not necessarily indicative of the results that may be expected for the year ending December 31, 2016, or for any future periods. This quarterly report on Form 10-Q should be read in conjunction with our audited financial statements and footnotes included in our annual report on Form 10-K for the fiscal year ended December 31, 2015. All information is presented in thousands, except per share amounts and where specifically noted.

The consolidated financial statements include accounts of Limelight and our wholly owned subsidiaries. All significant intercompany balances and transactions have been eliminated. In addition, certain other reclassifications have been made to prior year amounts to conform to the current year presentation.

***Use of Estimates***

The preparation of the consolidated financial statements and related disclosures in conformity with U.S. GAAP requires management to make judgments, assumptions, and estimates that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results and outcomes may differ from those estimates. The results of operations presented in this quarterly report on Form 10-Q are not necessarily indicative of the results that may be expected for the year ending December 31, 2016, or for any other future periods.

***Recent Accounting Standards***

***Recently Adopted Accounting Pronouncements***

In April 2015, the FASB issued ASU 2015-05, which provides guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance will not change U.S. GAAP for a customer's accounting for service contracts. We adopted this guidance effective January 1, 2016. We do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

***Recently Issued Accounting Pronouncements***

In May 2014, the FASB issued ASU 2014-09, which provides guidance for revenue recognition. The standard's core principle is that a company will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In doing so, companies will need to use more judgment and make more estimates than under today's guidance. These may include identifying performance obligations in the contract, estimating the amount of variable consideration to include in the transaction price and allocating the transaction price to each separate performance obligation. In August 2015, the FASB issued ASU 2015-14, which defers the effective date of ASU 2014-09 for all entities by one year. Accordingly, public business entities should apply the guidance in ASU 2014-09 to annual reporting periods (including interim periods within those periods) beginning after December 15, 2017. Early adoption is permitted but not before annual periods beginning after December 15,

## Table of Contents

2016. The standard permits the use of the retrospective or the modified approach method. We have not yet selected a transition method, and are currently in the process of evaluating the impact of adoption of this ASU on our consolidated financial statements and disclosures.

In November 2015, the FASB issued ASU 2015-17, which will require entities to present deferred tax assets (DTAs) and deferred tax liabilities (DTLs) as noncurrent in a classified balance sheet. ASU 2015-17 simplifies the current guidance, which requires entities to separately present DTAs and DTLs as current and noncurrent in a classified balance sheet. ASU 2015-17 is effective for financial statements issued for annual periods beginning after December 15, 2016, and interim periods within those annual periods. At this time we do not anticipate early adoption of this ASU, and we do not expect the adoption of this guidance to have a material impact on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, which establishes a right-of-use model that requires a lessee to record a right-of-use asset and a lease liability on the balance sheet for all leases with terms longer than twelve months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. This guidance is effective for fiscal years beginning after December 15, 2018, including interim periods within that reporting period. Early adoption is permitted and should be applied using a modified retrospective approach. We are in the process of evaluating the potential impacts of this new guidance on our consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU No. 2016-08, which clarifies the implementation guidance on principal versus agent considerations. The guidance includes indicators to assist an entity in determining whether it controls a specified good or service before it is transferred to the customers. We are in the process of evaluating the potential impact that adopting this new accounting standard will have on our consolidated financial statements and related disclosures.

In March 2016, the FASB issued ASU No. 2016-09, which updated guidance include changes to simplify the codification for several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. This guidance is effective for fiscal years beginning after December 15, 2016, including interim periods within that reporting period. Early adoption is permitted. We are in the process of evaluating the potential impacts of this new guidance on our consolidated financial statements.

### 3. Investments in Marketable Securities

During the quarter ended March 31, 2016, we sold the majority of our marketable securities.

The following is a summary of marketable securities, designated as available-for-sale, at March 31, 2016:

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Estimated Fair Value</u>
Certificate of deposits	\$ 40	\$ —	\$ —	\$ 40
Total marketable securities	<u>\$ 40</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 40</u>

The amortized cost and estimated fair value of marketable securities at March 31, 2016, by maturity, are shown below:

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Estimated Fair Value</u>
Available-for-sale securities				
Due in one year or less	\$ —	\$ —	\$ —	\$ —
Due after one year and through five years	40	—	—	40
	<u>\$ 40</u>	<u>\$ —</u>	<u>\$ —</u>	<u>\$ 40</u>

The following is a summary of marketable securities, designated as available-for-sale, at December 31, 2015:

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Estimated Fair Value</u>
Certificate of deposit	\$ 12,480	\$ 1	\$ 17	\$ 12,464
Corporate notes and bonds	15,940	2	44	15,898
Total marketable securities	<u>\$ 28,420</u>	<u>\$ 3</u>	<u>\$ 61</u>	<u>\$ 28,362</u>

## Table of Contents

The amortized cost and estimated fair value of marketable securities at December 31, 2015, by maturity, are shown below:

	<u>Amortized Cost</u>	<u>Gross Unrealized Gains</u>	<u>Gross Unrealized Losses</u>	<u>Estimated Fair Value</u>
Available-for-sale securities				
Due in one year or less	\$ 18,075	\$ 2	\$ 12	\$ 18,065
Due after one year and through five years	10,345	1	49	10,297
	<u>\$ 28,420</u>	<u>\$ 3</u>	<u>\$ 61</u>	<u>\$ 28,362</u>

### 4. Accounts Receivable, net

Accounts receivable, net include:

	<u>March 31, 2016</u>	<u>December 31, 2015</u>
Accounts receivable	\$ 28,914	\$ 28,599
Less: credit allowance	(350)	(460)
Less: allowance for doubtful accounts	(1,112)	(1,344)
Total accounts receivable, net	<u>\$ 27,452</u>	<u>\$ 26,795</u>

### 5. Prepaid Expenses and Other Current Assets

Prepaid expenses and other current assets include:

	<u>March 31, 2016</u>	<u>December 31, 2015</u>
Prepaid bandwidth and backbone	\$ 3,485	\$ 2,417
VAT receivable	1,152	2,720
Prepaid expenses and insurance	602	3,641
Vendor deposits and other	815	800
Total prepaid expenses and other current assets	<u>\$ 6,054</u>	<u>\$ 9,578</u>

### 6. Property and Equipment, net

Property and equipment, net include:

	<u>March 31, 2016</u>	<u>December 31, 2015</u>
Network equipment	\$ 127,444	\$ 129,172
Computer equipment and software	11,585	11,408
Furniture and fixtures	2,457	2,472
Leasehold improvements	4,977	4,976
Other equipment	166	166
Total property and equipment	146,629	148,194
Less: accumulated depreciation and amortization	(113,299)	(112,051)
Total property and equipment, net	<u>\$ 33,330</u>	<u>\$ 36,143</u>

Depreciation and amortization expense related to property and equipment classified in operating expense was \$617 and \$443 for the three months ended March 31, 2016 and 2015, respectively.

### 7. Restricted Cash

We consider cash that is legally restricted and cash that is held as a compensative balance for letters of credit arrangements as restricted cash. As of March 31, 2016, restricted cash of \$62,790 represents collateral for the letter of credit

## Table of Contents

for the upper end of our range of potential loss in our on-going intellectual property dispute with Akamai Technologies, Inc. Refer to Note 12 Contingencies - Legal Matters for further information.

### 8. Goodwill

We have recorded goodwill as a result of past business acquisitions. Goodwill is recorded when the purchase price paid for an acquisition exceeds the estimated fair value of the net identified tangible and intangible assets acquired. In each of our acquisitions, the objective of the acquisition was to expand our product offerings and customer base and to achieve synergies related to cross selling opportunities, all of which contributed to the recognition of goodwill.

We test goodwill for impairment on an annual basis or more frequently if events or changes in circumstances indicate that goodwill might be impaired. We concluded that we have one reporting unit and assigned the entire balance of goodwill to this reporting unit. The estimated fair value of the reporting unit is determined using our market capitalization as of our annual impairment assessment date or each reporting date if circumstances indicate the goodwill might be impaired. Items that could reasonably be expected to negatively affect key assumptions used in estimating fair value include but are not limited to:

- sustained decline in our stock price due to a decline in our financial performance due to the loss of key customers, loss of key personnel, emergence of new technologies or new competitors and/or unfavorable outcomes of intellectual property disputes;
- decline in overall market or economic conditions leading to a decline in our stock price; and
- decline in observed control premiums paid in business combinations involving comparable companies.

No interim indicators of impairment were identified as of March 31, 2016. Foreign currency translation adjustments increased the carrying amount of goodwill for the three months ended March 31, 2016 by \$227.

### 9. Other Current Liabilities

Other current liabilities include:

	March 31, 2016	December 31, 2015
Accrued compensation and benefits	\$ 3,511	\$ 4,786
Accrued cost of revenue	2,160	2,698
Deferred rent	685	782
Accrued legal fees	201	143
Other accrued expenses	2,062	2,448
Total other current liabilities	<u>\$ 8,619</u>	<u>\$ 10,857</u>

### 10. Line of Credit

On November 2, 2015, we entered into a Loan and Security Agreement (the Credit Agreement) with Silicon Valley Bank (SVB). The Credit Agreement provides for revolving credit borrowings up to a maximum principal amount of \$25,000. We are subject to a borrowing base calculation to determine the amount available to us. Our borrowing capacity is the lesser of the commitment amount or 80% of eligible accounts receivable. All outstanding borrowings owed under the Credit Agreement become due and payable no later than the final maturity date of November 2, 2017. We had no outstanding borrowings at December 31, 2015, and had availability under the Credit Agreement of approximately \$18,000. As of March 31, 2016, we had drawn \$12,790 against the line of credit and we had approximately \$6,400 available under the line of credit.

Borrowings under the Credit Agreement bear interest at our option of one, two, three or six-month LIBOR plus a margin of 2.75% or an Alternative Base Rate (ABR), which is defined as the higher of (a) Wall Street Journal prime rate or (b) Federal Funds Rate plus 0.50%, plus a margin of 0.50% or 1.50% depending on our minimum liquidity, as defined in the Credit Agreement. If we fall below a minimum liquidity of \$17,500, we are required to use the ABR interest rate. We incurred a commitment fee (issuance costs) of 0.25% upon entering into the Credit Agreement and 0.20% to be paid on the one year anniversary of closing. In addition, there is an unused line fee of 0.375% if our minimum liquidity is greater than \$17,500. If our minimum liquidity falls below \$17,500, the unused line fee is 0.250%. Commitment fees are included in prepaid expenses and other current assets and as amortized are charged to interest expense. During the quarter ended March 31, 2016, interest expense was \$73 and commitment fees amortization was \$26.

## Table of Contents

Any borrowings are secured by essentially all of our domestic personal property, with a negative pledge on intellectual property. SVB's security interest in our foreign subsidiaries is limited to 65% of voting stock of each such foreign subsidiary.

The Credit Agreement contains a covenant that requires us to maintain a minimum tangible net worth of \$100,000. Tangible net worth is defined as total stockholders' equity less cash held by our foreign subsidiaries, goodwill and other intangible assets. The tangible net worth requirement is adjusted by up to \$52,500 in the event we record a provision for or make a payment related to the Akamai '703 Litigation. We are also subject to certain customary limitations on our ability to, among other things, incur debt, grant liens, make acquisitions and other investments, make certain restricted payments such as dividends, dispose of assets or undergo a change in control.

In addition, the Credit Agreement contains a covenant limiting the maximum unfinanced capital expenditures amount to \$25,000 per annum. As of March 31, 2016, we were in compliance with all covenants under the Credit Agreement.

### **11. Other Long Term Liabilities**

Other long term liabilities include:

	March 31, 2016	December 31, 2015
Deferred rent	\$ 1,743	\$ 1,907
Income taxes payable	394	404
Total other long term liabilities	\$ 2,137	\$ 2,311

### **12. Contingencies**

#### *Legal Matters*

##### *Akamai '703 Litigation*

In June 2006, Akamai Technologies, Inc. and the Massachusetts Institute of Technology filed a lawsuit against us in the United States District Court for the District of Massachusetts alleging that we were infringing multiple patents assigned to MIT and exclusively licensed by MIT to Akamai. In February 2008, a jury returned a verdict in this lawsuit, finding that we infringed four claims of U.S. Patent No. 6,108,703 (the '703 patent) and awarded Akamai damages of approximately \$45,500, which included lost profits, reasonable royalties and price erosion damages for the period April 2005 through December 31, 2007. On April 24, 2009, the court granted our motion for judgment as a matter of law, thus overturning the jury's verdict finding us liable for infringing the '703 patent.

On August 13, 2015, after more than six years of appeals by both Akamai and us in the Federal Circuit and the Supreme Court of the United States, the Federal Circuit issued an opinion establishing a new standard for direct infringement in a divided actor scenario. The Federal Circuit then reinstating the 2008 jury verdict that we were liable for infringement of the '703 patent and denied any remaining legacy appeals. The case was remanded back to the District Court for the District of Massachusetts on December 23, 2015, to resolve questions of supplemental damages, applicable interest on the existing damages award and entry of final judgment, among other things.

After a series of motions filed by the parties in District Court, Akamai agreed to waive its right to supplemental damages, which limited the maximum potential damages for us to approximately \$62,790 plus future accruing interest (if any). We also petitioned review by the Supreme Court of the United States of the Federal Circuit's decision to reinstate the jury verdict. Our request for review was denied on April 18, 2016. Our motion seeking to challenge the validity of the '703 patent based on intervening changes in law was denied on April 25, 2016 by the District Court, which we believe was reversible error. We therefore intend to appeal that decision to the Federal Circuit. If our appeal is successful, we could eliminate all potential damages in this case. Based on our belief that the District Court committed reversible error in its April 25, 2016 denial, we believe a loss is not probable, thus a liability has not been recorded with respect to this matter. We believe \$62,790 in total damages, plus accrued and future accruing interest (if any) represents the upper end of our range of potential loss in this case.

Legal and other expenses associated with this case have been significant. We include these litigation expenses in general and administrative expenses as incurred, as reported in the consolidated statement of operations.

## Table of Contents

### *Akamai and XO Litigation*

On November 30, 2015, we filed a lawsuit against Akamai and XO Communications in the District Court for the Eastern District of Virginia alleging the infringement of our patents covering a broad range of inventions that we believe are critical to the effective and efficient delivery of bytes by a content delivery network. The trial date in this case is scheduled for January 3, 2017. We intend to vigorously protect our intellectual property rights in this matter.

### *2016 Akamai Litigation*

On February 16, 2016, Akamai filed a complaint against us in the District Court for the District of Massachusetts alleging infringement of three of its patents. We filed our answer to the complaint, denying each of the allegations of infringement, on April 7, 2016. We intend to vigorously defend against these claims.

### *Other Matters*

We are subject to various other legal proceedings and claims, either asserted or unasserted, arising in the ordinary course of business. While the outcome of these claims cannot be predicted with certainty, management does not believe the outcome of any of these matters will have a material adverse effect on our business, financial position, results of operations, or cash flows. Litigation relating to the content delivery services industry is not uncommon, and we are, and from time to time have been, subject to such litigation. No assurances can be given with respect to the extent or outcome of any such litigation in the future.

### *Taxes*

We are subject to indirect taxation in various states and foreign jurisdictions. Laws and regulations that apply to communications and commerce conducted over the Internet are becoming more prevalent, both in the United States and internationally, and may impose additional burdens on us conducting business online or providing Internet-related services. Increased regulation could negatively affect our business directly, as well as the businesses of our customers, which could reduce their demand for our services. For example, tax authorities in various states and abroad may impose taxes on the Internet-related revenue we generate based on regulations currently being applied to similar but not directly comparable industries.

There are many transactions and calculations where the ultimate tax determination is uncertain. In addition, domestic and international taxation laws are subject to change. In the future, we may come under audit, which could result in changes to our tax estimates. We believe we maintain adequate tax reserves to offset potential liabilities that may arise upon audit. Although we believe our tax estimates and associated reserves are reasonable, the final determination of tax audits and any related litigation could be materially different than the amounts established for tax contingencies. To the extent these estimates ultimately prove to be inaccurate, the associated reserves would be adjusted, resulting in the recording of a benefit or expense in the period in which a change in estimate or a final determination is made.

## **13. Net Loss per Share**

We calculate basic and diluted loss per weighted average share. We use the weighted-average number of shares of common stock outstanding during the period for the computation of basic earnings per share. Diluted earnings per share include the dilutive effect of all potentially dilutive common stock, including awards granted under our equity incentive compensation plans, in the weighted-average number of shares of common stock outstanding.

The following table sets forth the components used in the computation of basic and diluted net loss per share for the periods indicated:

	<b>Three Months Ended March 31,</b>	
	<b>2016</b>	<b>2015</b>
Net loss	\$ (5,946)	\$ (5,683)
Basic and diluted weighted average outstanding shares of common stock	102,693	98,636
Basic and diluted net loss per share:	\$ (0.06)	\$ (0.06)

For the three months ended March 31, 2016 and 2015, the following potentially dilutive common stock, including awards granted under our equity incentive compensation plans, were excluded from the computation of diluted net loss per

## Table of Contents

share because including them would have been anti-dilutive.

	Three Months Ended March 31,	
	2016	2015
Employee stock purchase plan	424	156
Stock options	134	1,261
Restricted stock units	524	2,698
	<u>1,082</u>	<u>4,115</u>

## 14. Stockholders' Equity

### *Common Stock*

On February 12, 2014, our board of directors authorized a \$15,000 share repurchase program. Under this program, we may repurchase shares periodically in the open market or through privately negotiated transactions, in accordance with applicable securities rules regarding issuer repurchases. We did not purchase any shares during the three months ended March 31, 2016. During the three months ended March 31 2015, we purchased and canceled 293 shares for \$818, including commissions and expenses. All repurchased shares were canceled and returned to authorized but unissued status.

### *Employee Stock Purchase Plan*

In June 2013, our stockholders approved our 2013 Employee Stock Purchase Plan (ESPP). The ESPP allows participants to purchase our common stock at a 15% discount of the lower of the beginning or end of the offering period using the closing price on that day. We did not issue any shares under the ESPP during the three months ended March 31, 2016. As of March 31, 2016, shares reserved for issuance to employees under this plan totaled 2,642, and we held employee contributions of \$602 (included in other current liabilities) for future purchases under the ESPP.

### *Preferred Stock*

Our board of directors has authorized the issuance of up to 7,500 shares of preferred stock at March 31, 2016. The preferred stock may be issued in one or more series pursuant to a resolution or resolutions providing for such issuance duly adopted by the board of directors. As of March 31, 2016, the board of directors had not adopted any resolutions for the issuance of preferred stock.

## 15. Accumulated Other Comprehensive Loss

Changes in the components of accumulated other comprehensive loss, net of tax, for the three months ended March 31, 2016, was as follows:

	Foreign Currency	Unrealized Gains (Losses) on Available for Sale Securities		Total
Balance, December 31, 2015	\$ (10,768)	\$ (44)	\$ (10,812)	
Other comprehensive income before reclassifications	659	—	659	
Amounts reclassified from accumulated other comprehensive income (loss)	—	44	44	
Net current period other comprehensive income	659	44	703	
Balance, March 31, 2016	<u>\$ (10,109)</u>	<u>\$ —</u>	<u>\$ (10,109)</u>	

## [Table of Contents](#)

### 16. Share-Based Compensation

The following table summarizes the components of share-based compensation expense included in our consolidated statement of operations:

	Three Months Ended March 31,	
	2016	2015
Share-based compensation expense by type:		
Stock options	\$ 983	\$ 1,182
Restricted stock units	2,360	1,813
ESPP	153	74
Total share-based compensation expense	<u>\$ 3,496</u>	<u>\$ 3,069</u>
Share-based compensation expense included in the consolidated statements of operations:		
Cost of services	\$ 473	\$ 513
General and administrative expense	1,826	1,406
Sales and marketing expense	737	689
Research and development expense	460	461
Total share-based compensation expense	<u>\$ 3,496</u>	<u>\$ 3,069</u>

Unrecognized share-based compensation expense totaled approximately \$20,586 at March 31, 2016, of which \$6,222 related to stock options and \$14,364 related to restricted stock units. We currently expect to recognize share-based compensation expense of \$8,313 during the remainder of 2016, \$7,883 in 2017 and the remainder thereafter based on scheduled vesting of the stock options and restricted stock units outstanding at March 31, 2016.

### 17. Leases and Commitments

#### *Operating Leases*

We are committed to various non-cancellable operating leases for office space and office equipment which expire through 2022. Certain leases contain provisions for renewal options and rent escalations upon expiration of the initial lease terms. Approximate future minimum lease payments over the remaining lease periods as of March 31, 2016, are as follows:

Remainder of 2016	\$ 2,995
2017	3,231
2018	3,009
2019	1,488
2020	566
Thereafter	414
Total minimum payments	<u>\$ 11,703</u>

## Table of Contents

### *Purchase Commitments*

We have long-term commitments for bandwidth usage and co-location with various networks and Internet service providers (ISPs). The following summarizes minimum commitments as of March 31, 2016:

Remainder of 2016	\$	26,638
2017		13,377
2018		2,822
2019		759
2020		70
Thereafter		8
Total minimum payments	\$	<u>43,674</u>

### *Capital Leases*

We lease equipment under capital lease agreements which extend through 2020. As of March 31, 2016, and December 31, 2015, the outstanding balance for capital leases was approximately \$3,166 and \$1,902, respectively. We have recorded assets under capital lease obligations of approximately \$3,416 and \$1,679, respectively, as of March 31, 2016 and December 31, 2015. Related accumulated amortization totaled approximately \$486 and \$210, respectively as of March 31, 2016 and December 31, 2015. The assets acquired under capital leases and related accumulated amortization are included in property and equipment, net in the consolidated balance sheets. The related amortization is included in depreciation and amortization expense (operating expenses) in the consolidated statements of operations. Interest expense related to capital leases was approximately \$35 and \$4, respectively, for the three months ended March 31, 2016 and 2015. Future minimum capital lease payments at March 31, 2016 were as follows:

Remainder of 2016	\$	615
2017		994
2018		994
2019		899
2020		47
Thereafter		—
Total		<u>3,549</u>
Amounts representing interest		(383)
Total minimum lease payments	\$	<u>3,166</u>

### **18. Concentrations**

During the three months ended March 31, 2016 and 2015, we had no customer who represented 10% or more of our total revenue.

Revenue from customers located within the United States, our country of domicile, was \$22,410 for the three months ended March 31, 2016, compared to \$25,611 for the three months ended March 31, 2015.

During the three months ended March 31, 2016, we had three countries, based on customer location, the United States, Japan, and the United Kingdom, that accounted for 10% or more of our total revenues. During the three months ended March 31, 2015, we had two countries, based on customer location, the United States and Japan that accounted for 10% or more of our total revenues.

### **19. Income Taxes**

Income taxes for the interim periods presented have been included in the accompanying consolidated financial statements on the basis of an estimated annual effective tax rate. Based on an estimated annual effective tax rate and discrete items, income tax expense for the three months ended March 31, 2016 and 2015, was \$158 and \$55, respectively. Income tax expense was different than the statutory income tax rate primarily due to us providing for a valuation allowance on deferred tax assets in certain jurisdictions, and the recording of state and foreign tax expense for the three month periods.

## Table of Contents

We file income tax returns in jurisdictions with varying statutes of limitations. Tax years 2013 through 2015 remain subject to examination by federal tax authorities. Tax years 2012 through 2015 generally remain subject to examination by state tax authorities. As of March 31, 2016, we are not under any federal or state examination for income taxes.

### 20. Segment Reporting and Geographic Areas

Our chief operating decision maker (whom is our Chief Executive Officer) reviews the financial information presented on a consolidated basis for purposes of allocating resources and evaluating our financial performance. We operate in one industry segment — content delivery and related services and we operate in three geographic areas — Americas, Europe, Middle East and Africa (EMEA) and Asia Pacific.

Revenue by geography is based on the location of the customer from which the revenue is earned. The following table sets forth our revenue by geographic area:

	Three Months Ended March 31,			
	2016		2015	
Americas	\$ 24,008	58.0%	\$ 27,259	64.4%
EMEA	8,912	21.5%	8,049	19.0%
Asia Pacific	8,502	20.5%	7,021	16.6%
Total revenue	\$ 41,422	100.0%	\$ 42,329	100.0%

The following table sets forth long-lived assets by geographic area in which the assets are located:

	March 31,	December 31,
	2016	2015
Americas	\$ 18,595	\$ 19,692
International	14,743	16,466
Total long-lived assets	\$ 33,338	\$ 36,158

### 21. Fair Value Measurements

As of March 31, 2016, and December 31, 2015, we held certain assets and liabilities that were required to be measured at fair value on a recurring basis.

The following is a summary of fair value measurements at March 31, 2016:

Description	Total	Fair Value Measurements at Reporting Date Using		
		Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Money market funds (2)	\$ 1	\$ 1	\$ —	\$ —
Certificate of deposit (1)	40	—	40	—
Total assets measured at fair value	\$ 41	\$ 1	\$ 40	\$ —

(1) Classified in marketable securities

(2) Classified in cash and cash equivalents

## Table of Contents

The following is a summary of fair value measurements at December 31, 2015:

Description	Total	Fair Value Measurements at Reporting Date Using		
		Quoted Prices In Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Money market funds (2)	\$ 725	\$ 725	\$ —	\$ —
Corporate notes and bonds (1)	15,898	—	15,898	—
Certificate of deposit (1)	12,464	—	12,464	—
Total assets measured at fair value	<u>\$ 29,087</u>	<u>\$ 725</u>	<u>\$ 28,362</u>	<u>\$ —</u>

- (1) Classified in marketable securities
- (2) Classified in cash and cash equivalents

The carrying amount of cash equivalents approximates fair value because their maturity is less than three months. The carrying amount of short-term and long-term marketable securities approximates fair value as the securities are marked to market as of each balance sheet date with any unrealized gains and losses reported in stockholders' equity. The carrying amount of accounts receivable, accounts payable and accrued liabilities approximates fair value due to the short-term maturity of the amounts.

## Table of Contents

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following discussion and analysis of our financial condition and results of operations should be read together with our consolidated financial statements and related notes included in Part I, Item 1 of this Quarterly Report on Form 10-Q, as well as the audited consolidated financial statements and notes thereto and management's discussion and analysis of financial condition and results of operations for the year ended December 31, 2015, included in Part II of our annual report on Form 10-K filed with the SEC, on February 11, 2016.*

*Prior period information has been modified to conform to current year presentation. All information in this Item 2 is presented in thousands, except per share amounts, customer count and where specifically noted.*

#### **Overview**

We were founded in 2001 as a provider of content delivery network services to deliver digital content over the Internet. We began development of our infrastructure in 2001 and began generating meaningful revenue in 2002. Today, we operate a globally distributed, high-performance, computing platform (our global network) and provide a suite of integrated services including content delivery services, video content management services, performance services for website and web application acceleration and security, and cloud storage services. The suite of services that we offer collectively comprise our Limelight Orchestrate Platform (the Orchestrate Platform)

We derive revenue primarily from the sale of components of the Orchestrate Platform. Our delivery services represented approximately 75% of our total revenue during the three months ended March 31, 2016. We also generate revenue through the sale of professional services and other infrastructure services, such as transit and rack space services.

We compete in markets that are highly competitive. We have experienced and expect to continue to experience increased competition in price, features, functionality, integration and other factors leading to customer churn and customers operating their own network. Competition and technology advancements have resulted in declining average selling prices in the industry. We believe continued increases in content delivery traffic growth rates is an important trend that will continue to outpace declining average selling prices in the industry.

For the three months ended March 31, 2016 and 2015, respectively, we had no customer who accounted for 10% or more of our total revenue. Changes in revenue are driven by a small subset of large customers who have low contractually committed obligations.

In addition to these revenue-related trends, our profitability is impacted by trends in our costs of services and operating expenses. We continue to work with our vendors to consolidate our datacenter footprint and renegotiate our fixed rate infrastructure contracts to variable rate in order to scale our operations based on traffic levels and lower bandwidth costs per unit. Our operating expenses are largely driven by payroll and related employee costs. Our headcount decreased from 509 at December 31, 2015, to 501 as of March 31, 2016.

After a series of motions filed by the parties in District Court during the first quarter of 2016, Akamai agreed to waive its right to supplemental damages, which limited the maximum potential damages for us to approximately \$62,790 plus future accruing interest (if any). We also petitioned review by the Supreme Court of the United States of the Federal Circuit's decision to reinstate the jury verdict. Our request for review was denied on April 18, 2016. Our motion seeking to challenge the validity of the '703 patent based on intervening changes in law was denied on April 25, 2016 by the District Court, which we believe was reversible error. We therefore intend to appeal that decision to the Federal Circuit. If our appeal is successful, we could eliminate all potential damages in this case. Based on our belief that the District Court committed reversible error in its April 25, 2016 denial, we believe a loss is not probable, thus a liability has not been recorded with respect to this matter. We believe \$62,790 in total damages, plus accrued and future accruing interest (if any) represents the upper end of our range of potential loss in this case.

In the Eastern District of Virginia, the judge set January 3, 2017, as the trial date in our offensive patent case against Akamai and XO Communications. We intend to vigorously protect our intellectual property rights in this matter.

On February 16, 2016, Akamai filed a complaint against us in the District Court for the District of Massachusetts alleging infringement of three of its patents. We filed our answer to the complaint, denying each of the allegations of infringement, on April 7, 2016. We intend to vigorously defend against these claims.

Please see our discussion in Note 12 "Contingencies - Legal Matters" of the Notes to Consolidated Financial Statements included in Part I, of this quarterly report on Form 10-Q for more information on these lawsuits.

## Table of Contents

On November 2, 2015, we entered into a Credit Agreement with Silicon Valley Bank (SVB). The Credit Agreement provides for revolving credit borrowings up to a maximum principal amount of \$25,000. During the three months ended March 31, 2016, we borrowed \$12,790 to assist with the funding of a Stand-By Letter of Credit related to Akamai's intellectual property lawsuit against us. Refer to Note 12 Contingencies - Legal Matters for further information. This Credit Agreement will also provide additional liquidity as we continue to execute our growth strategy through innovative product development and select global market expansion.

The following table summarizes our revenue, costs and expenses in thousands of dollars and as a percentage of total revenue.

	Three Months Ended March 31,			
	2016		2015	
Revenues	\$ 41,422	100.0 %	\$ 42,329	100.0 %
Cost of revenue	24,778	59.8 %	25,810	61.0 %
Gross profit	16,644	40.2 %	16,519	39.0 %
Operating expenses	22,659	54.7 %	24,029	56.8 %
Operating loss	(6,015)	(14.5)%	(7,510)	(17.7)%
Total other income (expense)	227	0.5 %	1,882	4.4 %
Loss before income taxes	(5,788)	(14.0)%	(5,628)	(13.3)%
Income tax expense	158	0.4 %	55	0.1 %
Net loss	<u>(5,946)</u>	<u>(14.4)%</u>	<u>(5,683)</u>	<u>(13.4)%</u>

### **Use of Non-GAAP Financial Measures**

To evaluate our business, we consider and use non-generally accepted accounting principles (Non-GAAP) net loss, EBITDA and Adjusted EBITDA as supplemental measures of operating performance. These measures include the same adjustments that management takes into account when it reviews and assesses operating performance on a period-to-period basis. We consider Non-GAAP net loss to be an important indicator of overall business performance. We define Non-GAAP net loss to be U.S. GAAP net loss, adjusted to exclude share-based compensation, litigation expenses, and amortization of intangible assets. We believe that EBITDA provides a useful metric to investors to compare us with other companies within our industry and across industries. We define EBITDA as U.S. GAAP net loss, adjusted to exclude interest and other (income) expense, interest expense, income tax expense, and depreciation and amortization. We define Adjusted EBITDA as EBITDA adjusted to exclude share-based compensation and litigation expenses. We use Adjusted EBITDA as a supplemental measure to review and assess operating performance. We also believe use of Adjusted EBITDA facilitates investors' use of operating performance comparisons from period to period, as well as across companies.

In our April 27, 2016, earnings press release, as furnished on Form 8-K, we included Non-GAAP net loss, EBITDA and Adjusted EBITDA. The terms Non-GAAP net loss, EBITDA and Adjusted EBITDA are not defined under U.S. GAAP, and are not measures of operating income, operating performance or liquidity presented in accordance with U.S. GAAP. Our Non-GAAP net loss, EBITDA and Adjusted EBITDA have limitations as analytical tools, and when assessing our operating performance, Non-GAAP net loss, EBITDA and Adjusted EBITDA should not be considered in isolation, or as a substitute for net loss or other consolidated income statement data prepared in accordance with U.S. GAAP. Some of these limitations include, but are not limited to:

- EBITDA and Adjusted EBITDA do not reflect our cash expenditures or future requirements for capital expenditures or contractual commitments;
- these measures do not reflect changes in, or cash requirements for, our working capital needs;
- Adjusted EBITDA does not reflect the cash requirements necessary for litigation costs;
- these measures do not reflect the interest expense, or the cash requirements necessary to service interest or principal payments, on our debt that we may incur;
- these measures do not reflect income taxes or the cash requirements for any tax payments;
- although depreciation and amortization are non-cash charges, the assets being depreciated and amortized will be replaced sometime in the future, and EBITDA and Adjusted EBITDA do not reflect any cash requirements for such replacements;

## Table of Contents

- while share-based compensation is a component of operating expense, the impact on our financial statements compared to other companies can vary significantly due to such factors as the assumed life of the options and the assumed volatility of our common stock; and
- other companies may calculate EBITDA from continuing operations and Adjusted EBITDA differently than we do, limiting their usefulness as comparative measures.

We compensate for these limitations by relying primarily on our U.S. GAAP results and using Non-GAAP net income (loss), EBITDA, and Adjusted EBITDA only as supplemental support for management's analysis of business performance. Non-GAAP net income (loss), EBITDA and Adjusted EBITDA are calculated as follows for the periods presented.

### **Reconciliation of Non-GAAP Financial Measures**

In accordance with the requirements of Item 10(e) of Regulation S-K, we are presenting the most directly comparable U.S. GAAP financial measures and reconciling the unaudited Non-GAAP financial metrics to the comparable U.S. GAAP measures.

#### **Reconciliation of U.S. GAAP Net Loss to Non-GAAP Net Loss (Unaudited)**

	Three Months Ended		
	March 31, 2016	December 31, 2015	March 31, 2015
U.S. GAAP net loss	\$ (5,946)	\$ (4,145)	\$ (5,683)
Share-based compensation	3,496	2,863	3,069
Litigation expenses	1,178	402	19
Amortization of intangible assets	6	461	197
Non-GAAP net loss	<u>\$ (1,266)</u>	<u>\$ (419)</u>	<u>\$ (2,398)</u>

#### **Reconciliation of U.S. GAAP Net Loss to EBITDA to Adjusted EBITDA (Unaudited)**

	Three Months Ended		
	March 31, 2016	December 31, 2015	March 31, 2015
U.S. GAAP net loss	\$ (5,946)	\$ (4,145)	\$ (5,683)
Depreciation and amortization	5,291	5,816	4,793
Interest expense	179	25	4
Interest and other (income) expense	(406)	321	(1,886)
Income tax expense	158	46	55
EBITDA	<u>\$ (724)</u>	<u>\$ 2,063</u>	<u>\$ (2,717)</u>
Share-based compensation	3,496	2,863	3,069
Litigation expenses	1,178	402	19
Adjusted EBITDA	<u>\$ 3,950</u>	<u>\$ 5,328</u>	<u>\$ 371</u>

### **Critical Accounting Policies and Estimates**

Our critical accounting policies and estimates are disclosed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2015. During the three months ended March 31, 2016, there have been no significant changes in our critical accounting policies and estimates.

## Table of Contents

### Results of Operations

#### Revenue

We derive revenue primarily from the sale of components of the Orchestra Platform. We also generate revenue through the sale of professional services and other infrastructure services, such as transit and rack space services.

The following table reflects our revenue for the three months ended March 31, 2016, compared to the three months ended March 31, 2015:

	Three Months Ended March 31,			
	2016	2015	\$ Change	% Change
Revenue	\$ 41,422	\$ 42,329	\$ (907)	(2.1)%

Our revenue decreased during the three months ended March 31, 2016, versus the comparable 2015 period primarily due to a decrease in our content delivery revenue, which was driven by volume decreases with certain of our larger customers, and by a decrease in average selling price.

Our active customers worldwide decreased to 926 as of March 31, 2016, compared to 1,080 as of March 31, 2015. We are continuing our selective approach to accepting profitable business by following a clear process for identifying customers that value quality, performance, availability, and service.

During the three months ended March 31, 2016 and 2015, sales to our top 20 customers accounted for approximately 62% and 56%, respectively, of our total revenue. The customers that comprised our top 20 customers change from time to time, and our large customers may not continue to be as significant going forward as they have been in the past.

During the three months ended March 31, 2016 and 2015, we had no customer that represented 10% or more of our total revenue.

Revenue by geography is based on the location of the customer from which the revenue is earned. The following table sets forth revenue by geographic area (in thousands and as a percentage of total revenue):

	Three Months Ended March 31,			
	2016		2015	
Americas	\$ 24,008	58.0%	\$ 27,259	64.4%
EMEA	8,912	21.5%	8,049	19.0%
Asia Pacific	8,502	20.5%	7,021	16.6%
Total revenue	\$ 41,422	100.0%	\$ 42,329	100.0%

Based on current market conditions, we anticipate revenues for the year ended December 31, 2016, will range between \$180,000 and \$188,000.

#### Cost of Revenue

Cost of revenue consists primarily of fees paid to network providers for bandwidth and backbone, costs incurred for non-settlement free peering and connection to Internet service providers or ISPs, and fees paid to data center operators for housing of our network equipment in third party network data centers, also known as co-location costs. Cost of revenue also includes leased warehouse space and utilities, depreciation of network equipment used to deliver our content delivery services, payroll and related costs, and share-based compensation for our network operations and professional services personnel. Other costs include professional fees and outside services, travel and travel-related expenses and royalty expenses.

Cost of revenue was composed of the following (in thousands and as a percentage of total revenue):

## Table of Contents

	<b>Three Months Ended March 31,</b>			
	<b>2016</b>		<b>2015</b>	
Bandwidth and co-location fees	\$ 14,379	34.7%	\$ 14,269	33.7%
Depreciation - network	4,668	11.3%	4,153	9.8%
Payroll and related employee costs	3,964	9.6%	5,073	12.0%
Share-based compensation	473	1.1%	513	1.2%
Other costs	1,294	3.1%	1,802	4.3%
Total cost of revenue	<u>\$ 24,778</u>	59.8%	<u>\$ 25,810</u>	61.0%

Our cost of revenue decreased in aggregate dollars and as a percentage of revenue for the three months ended March 31, 2016, versus the comparable 2015 period primarily as a result of the following:

- decreased payroll and related employee costs due to lower operations headcount primarily driven by the reorganization of job responsibilities on April 1, 2015 (as further discussed below); and
- decreased other costs, which were primarily other recurring cost of sales, professional fees, and facilities costs.

These decreases were partially offset by increased depreciation as a result of new servers and network equipment placed in service, as well as bandwidth and co-location fees as a percentage of revenue. Co-location fees decreased as a result of our continued consolidation efforts, however, this decrease was offset by an increase in bandwidth costs due to increased traffic volume.

Effective April 1, 2015, we reorganized the job responsibilities of certain employees, and as a result, such employee expenses were moved from cost of services to research and development, on a prospective basis. This reorganization resulted in approximately \$650 of payroll and related employee costs starting in the second quarter of 2015 to be allocated to research and development, which were previously allocated to cost of services.

We anticipate an improvement in gross margin for the full year 2016 compared to 2015 as a result of our co-location consolidation efforts, despite an increase in our depreciation expense related to our network equipment. Depreciation expense is expected to increase due to the increase in capital expenditures in 2015 compared to prior periods.

### ***General and Administrative***

General and administrative expense was composed of the following (in thousands and as a percentage of total revenue)

	<b>Three Months Ended March 31,</b>			
	<b>2016</b>		<b>2015</b>	
Payroll and related employee costs	\$ 1,966	4.7%	\$ 2,959	7.0%
Professional fees and outside services	826	2.0%	1,004	2.4%
Share-based compensation	1,826	4.4%	1,406	3.3%
Other costs	2,190	5.3%	1,481	3.5%
Total general and administrative	<u>\$ 6,808</u>	16.4%	<u>\$ 6,850</u>	16.2%

Our general and administrative expense slightly decreased in aggregate dollars and slightly increased as a percentage of total revenue for the three months ended March 31, 2016, versus the comparable 2015 period primarily due to decreased payroll and related employee costs due to decreased headcount, and decreased professional fees, primarily due to lower consulting and general legal fees.

These decreases were partially offset by increased share-based compensation and other costs, which was driven by increased litigation expenses, and partially offset by decreased bad debt expense.

We expect our general and administrative expenses for 2016 to increase from 2015 in aggregate dollars as a result of on-going litigation expenses.

### ***Sales and Marketing***

Sales and marketing expense was composed of the following (in thousands and as a percentage of total revenue):

## Table of Contents

	Three Months Ended March 31,			
	2016		2015	
Payroll and related employee costs	\$ 6,197	15.0%	\$ 6,755	16.0%
Share-based compensation	737	1.8%	689	1.6%
Marketing programs	321	0.8%	473	1.1%
Other costs	1,648	4.0%	2,359	5.6%
Total sales and marketing	<u>\$ 8,903</u>	<u>21.5%</u>	<u>\$ 10,276</u>	<u>24.3%</u>

Our sales and marketing expense decreased in both aggregate dollars and as a percentage of total revenue for the three months ended March 31, 2016, versus the comparable 2015 period. The decrease in sales and marketing expense was primarily as a result of the following:

- decreased payroll and related employee costs due to decreased sales and marketing personnel and lower variable compensation;
- decreased other costs which was primarily lower travel and entertainment expenses and professional fees (consulting, recruiting, and outside services); and
- decreased marketing and public relations spending related to advertising and trade shows.

These decreases were partially offset by increased share-based compensation.

We expect our sales and marketing expenses for 2016 to remain consistent with 2015.

### ***Research and Development***

Research and development expense was composed of the following (in thousands and as a percentage of total revenue):

	Three Months Ended March 31,			
	2016		2015	
Payroll and related employee costs	\$ 4,999	12.1%	\$ 4,820	11.4%
Share-based compensation	460	1.1%	461	1.1%
Other costs	866	2.1%	982	2.3%
Total research and development	<u>\$ 6,325</u>	<u>15.3%</u>	<u>\$ 6,263</u>	<u>14.8%</u>

Our research and development expense increased in aggregate dollars and as a percentage of total revenue for the three months ended March 31, 2016, versus the comparable 2015 period, primarily due to increased payroll and related employee costs due to increased headcount as we expand our research and development activities.

These increases were partially offset by decreased other costs primarily due to decreased professional fees (consulting and recruiting), and travel expenses.

Effective April 1, 2015, we reorganized the job responsibilities of certain employees, and as a result, such employee expenses were moved from cost of services to research and development, on a prospective basis. This reorganization resulted in approximately \$650 of payroll and related employee costs starting in the second quarter of 2015 being allocated to research and development, which were previously allocated to cost of services.

We expect our research and development expenses for 2016 to remain consistent with 2015.

### ***Depreciation and Amortization (Operating Expenses)***

Depreciation and amortization expense was \$623, or 1.5% of revenue, for the three months ended March 31, 2016, versus \$640, or 1.5% of revenue, for the comparable 2015 period. Depreciation expense consists of depreciation on equipment and furnishings used by general administrative, sales and marketing, and research and development personnel. Amortization expense consists of amortization of intangible assets acquired in business combinations.

## Table of Contents

### *Interest Expense*

Interest expense was \$179 for the three months ended March 31, 2016, versus \$4 for the comparable 2015 period. This increase was primarily due to interest on our line of credit borrowings, capital leases, amortization of fees associated with our Credit Agreement and stand-by letter of credit.

### *Interest Income*

Interest income was \$6 for the three months ended March 31, 2016, versus \$74 for the comparable 2015 period. Interest income includes interest earned on invested cash balances and marketable securities.

### *Other Income (Expense)*

Other income was \$400 for the three months ended March 31, 2016, versus \$1,812 for the comparable 2015 period. For the three months ended March 31, 2016, other income consisted primarily of foreign currency transaction gains and losses, and the receipt of a state tax refund related to a previously divested business. For the three months ended March 31, 2015, other income consisted primarily of foreign currency transaction gains and losses.

### *Income Tax Expense*

Based on an estimated annual effective tax rate and discrete items, the estimated income tax expense for the three months ended March 31, 2016, was \$158 versus \$55 for the comparable 2015 period. Income tax expense on our loss before income taxes was different than the statutory income tax rate primarily due to our providing for a valuation allowance on deferred tax assets in certain jurisdictions, and recording of state and foreign tax expense for the quarter and year to date periods. The effective income tax rate is based primarily upon forecasted income or loss for the year, the composition of the income or loss in different countries, and adjustments, if any, for the potential tax consequences, benefits or resolutions for tax audits.

### **Liquidity and Capital Resources**

As of March 31, 2016, our cash, cash equivalents and marketable securities classified as current totaled \$24,141. Included in this amount is approximately \$5,294 of cash and cash equivalents held outside the United States that would be subject to withholding taxes upon repatriation. Changes in cash, cash equivalents and marketable securities are dependent upon changes in, among other things, working capital items such as deferred revenues, accounts payable, accounts receivable, accrued provision for litigation and various accrued expenses, as well as purchases of property and equipment and changes in our capital and financial structure due to debt repurchases and issuances, stock option exercises, sales of equity investments and similar events.

We believe that our existing cash, cash equivalents and marketable securities, and available borrowing capacity will be sufficient to meet our anticipated cash needs for at least the next 12 months. If the assumptions underlying our business plan regarding future revenue and expenses change, including as a result of ongoing litigation with Akamai, or if unexpected opportunities or needs arise, we may seek to raise additional cash by selling equity or debt securities.

The major components of changes in cash flows for the three months ended March 31, 2016 and 2015, are discussed in the following paragraphs.

### *Operating Activities*

Net cash provided by operating activities was \$3,170 for the three months ended March 31, 2016, versus net cash used in operating activities of \$4,548 for the comparable 2015 period, an increase of \$7,718. Changes in operating assets and liabilities of \$613 during the three months ended March 31, 2016, versus (\$5,287) in the comparable 2015 period were primarily due to:

- accounts receivable increased \$540 during the three months ended March 31, 2016, due to a small increase in days sales outstanding (DSO) as a result of timing of collections as compared to a \$4,980 increase in the comparable 2015 period;
- prepaid expenses and other current assets decreased \$3,583 during the three months ended March 31, 2016, due to the receipt of VAT refunds and the amortization of prepaid bandwidth expenses compared to a \$1,150 decrease in the comparable 2015 period;

## Table of Contents

- other assets decreased \$342 during the three months ended March 31, 2016, due to a decrease in vendor deposits and other long term assets versus a decrease of \$792 for the comparable 2015 period; and
- accounts payable and other current liabilities decreased \$4,005 during the three months ended March 31, 2016 versus a decrease of \$1,723 for the comparable 2015 period due to timing of vendor payments and the payment of 2015 accrued compensation.

Cash provided by operating activities may not be sufficient to cover new purchases of property and equipment during 2016 and potential litigation expenses associated with patent litigation, including any potential payment required on the ultimate outcomes of the associated litigation. The timing and amount of future working capital changes and our ability to manage our days sales outstanding will also affect the future amount of cash used in or provided by operating activities.

### *Investing Activities*

Net cash used in investing activities was \$35,896 for the three months ended March 31, 2016, versus net cash used in investing activities of \$6,782 for the comparable 2015 period. During the three months ended March 31, 2016, we liquidated our investments in marketable securities in order to provide collateral for the letter of credit for the upper end of our range of potential loss in our on-going intellectual property dispute with Akamai Technologies, Inc. Refer to Note 12 Contingencies - Legal Matters for further information.

We expect to have ongoing capital expenditure requirements as we continue to invest in and expand our content delivery network. During the three months ended March 31, 2016, we made capital expenditures of \$1,421, which represented approximately 3% of our total revenue. We currently expect a decrease in capital expenditures in 2016 compared to 2015, as we believe technological enhancements in our software will provide increased capacity in our global network and systems.

### *Financing Activities*

Net cash provided by financing activities was \$12,028 for the three months ended March 31, 2016, versus net cash used in financing activities of \$447 for the comparable 2015 period. Net cash provided by financing activities in the three months ended March 31, 2016, primarily relates to proceeds from borrowings against our line of credit of \$12,790, and cash received from the exercise of stock options and our employee stock purchase plan of \$43, offset by payments of employee tax withholdings related to the net settlement of vested restricted stock units of \$646 and principal payments made on our capital lease obligations of \$159.

Net cash used in financing activities in the three months ended March 31, 2015, related to payments of employee tax withholdings related to the net settlement of vested restricted stock units of \$1,107, cash paid for the repurchase of our common stock of \$957, and payments made on our capital lease obligations of \$358, offset by cash received from the exercise of stock options and our employee stock plan of \$1,975.

### *Line of Credit*

On November 2, 2015, we entered into a Credit Agreement with SVB. The Credit Agreement provides for revolving credit borrowings up to a maximum principal amount of \$25,000. As of March 31, 2016, we have outstanding borrowings against the line of credit of \$12,790. All outstanding borrowings owed under the Credit Agreement become due and payable no later than the final maturity date of November 2, 2017. For a more detailed discussion regarding our Credit Agreement, please refer to Note 10 Line of Credit of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q.

### *Financial Covenants and Borrowing Limitations*

The Credit Agreement requires, and any future credit facilities will likely require, us to comply with specified financial requirements that may limit the amount we can borrow. A breach of any of these covenants could result in a default. Our ability to satisfy those covenants depends principally upon our ability to meet or exceed certain financial performance results. Any debt agreements we enter into in the future may further limit our ability to enter into certain types of transactions.

The Credit Agreement contains a covenant that requires us to maintain a minimum tangible net worth of \$100,000. Tangible net worth is defined as total shareholders' equity less cash held by our foreign subsidiaries, goodwill and other intangible assets. The tangible net worth requirement is adjusted by up to \$52,500 in the event we record a provision for or make a payment related to the Akamai '703 Litigation. We are also subject to certain customary limitations on our ability to, among other things, incur debt, grant liens, make acquisitions and other investments, make certain restricted payments such as dividends, dispose of assets or undergo a change in control. The tangible net worth covenant could have the effect of limiting our availability under the Credit Agreement, as additional borrowings would be prohibited if we would be in violation of such

## Table of Contents

covenant. In addition, we have a maximum unfinanced capital expenditures amount of \$25,000 per annum. As of March 31, 2016, we remained in compliance with our debt covenants.

The maximum amount we can borrow under the Credit Agreement is subject to contractual and borrowing base limitations, which could significantly and negatively impact our future access to capital required to operate our business. Borrowing base limitations are based upon eligible accounts receivable. If the value of our accounts receivable decreases for any reason, or if some portion of our accounts receivable is deemed ineligible under the terms of the Credit Agreement, the amount we can borrow under the Credit Agreement could be reduced. These limitations could have a material adverse impact on our liquidity and financial condition. We had no outstanding borrowings at December 31, 2015, and had availability under the Credit Agreement of approximately \$18,000. As of March 31, 2016, we had borrowed \$12,790, and our remaining availability under the Credit Agreement was approximately \$6,400.

We may also be prevented from taking advantage of business opportunities that arise because of the limitations imposed on us by restrictive covenants within the Credit Agreement. These restrictions may also limit our ability to plan for or react to market conditions, meet capital needs or otherwise restrict our activities or business plans and adversely affect our ability to finance our operations, enter into acquisitions, execute our business strategy, effectively compete with companies that are not similarly restricted or engage in other business activities that would be in our interest. In the future, we may also incur debt obligations that might subject us to additional and different restrictive covenants that could affect our financial and operational flexibility. We cannot assure you that we will be granted waivers or amendments to the indenture governing the Credit Agreement, or such other debt obligations if for any reason we are unable to comply with our obligations thereunder or that we will be able to refinance our debt on acceptable terms, or at all, should we seek to do so. Any such limitations on borrowing under the Credit Agreement, including a payment related to the Akamai '703 Litigation toward the upper end or in excess of the range of loss, could have a material adverse impact on our liquidity and our ability to continue as a going concern could be impaired.

### *Capital leases*

In October 2015, we entered into a \$10,000 equipment financing arrangement. The arrangement allows us to finance equipment purchases over a period of 4 years at variable interest rates. As of March 31, 2016, and December 31, 2015, we have approximately \$3,166 and \$1,902 in capital leases outstanding.

### *Share repurchases*

On February 12, 2014, our board of directors authorized a \$15,000 share repurchase program. During the three months ended March 31, 2015, we purchased and canceled approximately 293 shares. All repurchased shares were canceled and returned to authorized but unissued status. During the three months ended March 31, 2016, we did not purchase any shares. As of March 31, 2016, we have \$9,525 remaining under this share repurchase authorization.

### **Contractual Obligations, Contingent Liabilities, and Commercial Commitments**

In the normal course of business, we make certain long-term commitments for operating leases, primarily office facilities, bandwidth, and computer rack space. These leases expire on various dates ranging from 2016 to 2022. We expect that the growth of our business will require us to continue to add to and increase our long-term commitments in 2016 and beyond. As a result of our growth strategies, we believe that our liquidity and capital resources requirements will grow.

The following table presents our contractual obligations and commercial commitments, as of March 31, 2016, over the next five years and thereafter:

## Table of Contents

	Payments Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating Leases					
Bandwidth leases	\$ 26,694	\$ 19,986	\$ 6,497	\$ 210	\$ 1
Rack space leases	16,936	12,096	4,460	380	—
Real estate leases	11,703	3,855	6,053	1,487	308
Total operating leases	55,333	35,937	17,010	2,077	309
Capital leases	3,549	867	1,988	694	—
Bank debt (1)	12,790	—	12,790	—	—
Interest on bank debt (2)	826	519	307	—	—
Other purchase obligations	44	44	—	—	—
Total commitments	\$ 72,542	\$ 37,367	\$ 32,095	\$ 2,771	\$ 309

1. Please refer to Note 10 Line of Credit of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q for additional information about our bank debt.

2. Amounts represent estimate of future interest payments on our bank debt using the interest rate in effect at March 31, 2016.

### Off Balance Sheet Arrangements

As of March 31, 2016, we are not involved in any off-balance sheet arrangements, as defined in Item 303(a)(4)(ii) of SEC Regulation S-K.

### Item 3. Quantitative and Qualitative Disclosures about Market Risk

#### Interest Rate Risk

Our exposure to market risk for changes in interest rates relates primarily to our debt and investment portfolio. In our investment portfolio, we do not use derivative financial instruments. Our investments are primarily with our commercial and investment banks and, by policy, we limit the amount of risk by investing primarily in money market funds, United States Treasury obligations, high quality corporate and municipal obligations, and certificates of deposit. Our outstanding capital lease obligations bear variable interest rates and are impacted by fluctuations in interest rates. We do not believe that an interest rate increase related to our capital leases would be material to our results of operations. Interest expense on our line of credit will fluctuate as the interest rate for the line of credit floats based, at our option of one, two, three or six-month LIBOR plus a margin of 2.75% or an Alternative Base Rate (ABR), which is defined as the higher of (a) Wall Street Journal prime rate or (b) Federal Funds Rate plus 0.50%, plus a margin of 0.50% or 1.50% depending on our minimum liquidity, as defined in the Agreement. If we fall below a minimum liquidity of \$17,500, we are required to use the ABR interest rate. An increase in interest rates of 100 basis points would add \$10 of interest expense per year, to our financial position or results of operations, for each \$1,000 drawn on the line of credit. As of March 31, 2016, there was \$12,790 in outstanding borrowings against the line of credit.

#### Foreign Currency Risk

We operate in the Americas, EMEA and Asia-Pacific. As a result of our international business activities, our financial results could be affected by factors such as changes in foreign currency exchange rates or economic conditions in foreign markets, and there is no assurance that exchange rate fluctuations will not harm our business in the future. We have foreign currency exchange rate exposure on our results of operations as it relates to revenues and expenses denominated in foreign currencies. A portion of our cost of revenues and operating expenses are denominated in foreign currencies as are our revenues associated with certain international customers. To the extent that the U.S. dollar weakens, similar foreign currency denominated transactions in the future will result in higher revenues and higher cost of revenues and operating expenses, with expenses having the greater impact on our financial results. Similarly, our revenues and expenses will decrease if the U.S. dollar strengthens against these foreign currencies. Although we will continue to monitor our exposure to currency fluctuations, and, where appropriate, may use financial hedging techniques in the future to minimize the effect of these fluctuations, we are not currently engaged in any financial hedging transactions. Assuming a 10% weakening of the U.S. dollar relative to our foreign currency denominated revenues and expenses, our net loss for the year ended December 31, 2015, and

## Table of Contents

the three months ended March 31, 2016, would have been higher by approximately \$2,979 and \$691, respectively. There are inherent limitations in the sensitivity analysis presented, primarily due to the assumption that foreign exchange rate movements across multiple jurisdictions are similar and would be linear and instantaneous. As a result, the analysis is unable to reflect the potential effects of more complex markets or other changes that could arise, which may positively or negatively affect our results of operations.

### ***Inflation Risk***

We do not believe that inflation has had a material effect on our business, financial condition, or results of operations. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could harm our business, financial condition and results of operations.

### ***Credit Risk***

During any given fiscal period, a relatively small number of customers typically account for a significant percentage of our revenue. During the three months ended March 31, 2016 and 2015, sales to our top 20 customers accounted for approximately 62% and 56%, respectively, of our total revenue. During the three months ended March 31, 2016 and 2015, we had no customer who represented 10% or more of our total revenue. In 2016, we anticipate that our top 20 customer concentration levels will remain consistent with the concentration levels from 2015. In the past, the customers that comprised our top 20 customers have continually changed, and our large customers may not continue to be as significant going forward as they have been in the past.

## **Item 4. Controls and Procedures**

### ***Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures***

We are responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in SEC Rules 13a-15(e) and 15d-15(e). We maintain disclosure controls and procedures, as such term is defined in SEC Rules 13a-15(e) and 15d-15(e), that are designed to ensure that information required to be disclosed in our reports under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by SEC Rule 13a-15(b), we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of March 31, 2016. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

### ***Changes in Internal Control over Financial Reporting***

There have been no changes in our internal control over financial reporting, as defined in SEC Rules 13a-15(f) and 15d-15(f), during the fiscal quarter ended March 31, 2016, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## Table of Contents

### **PART II. OTHER INFORMATION**

#### **Item 1. Legal Proceedings**

For a description of our material pending legal proceedings, please refer to Note 12 Contingencies - Legal Matters of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this Quarterly Report on Form 10-Q, which is incorporated herein by reference.

#### **Item 1A. Risk Factors**

*Investing in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this Quarterly Report on Form 10-Q, including the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part I, Item II, and our consolidated financial statements and related notes, before making a decision to invest in our common stock. The risks and uncertainties described below may not be the only ones we face. If any of the risks actually occur, our business, financial condition, operating results and prospects could be materially and adversely affected. In that event, the market price of our common stock could decline, and you could lose part or all of your investment. All information is presented in thousands, except per share amounts, customer count, head count and where specifically noted.*

#### **Risks Related to Our Business**

##### **We currently face competition from established competitors and may face competition from others in the future.**

We compete in markets that are intensely competitive, rapidly changing and characterized by frequently declining prices. In these markets, vendors offer a wide range of alternate solutions. We have experienced and expect to continue to experience increased competition on price, features, functionality, integration and other factors. Many of our current competitors, as well as a number of our potential competitors, have longer operating histories, greater name recognition, broader customer relationships and industry alliances, and substantially greater financial, technical and marketing resources than we do. As a consequence of the competitive dynamics in our markets, we have experienced reductions in our prices, and an increased requirement for product advancement and innovation in order to remain competitive, which in turn have adversely affected and may continue to adversely affect our revenue, gross margin and operating results.

Our primary competitors for the content delivery service offering of our Orchestrate Platform include Akamai, Level 3, Amazon, CDNetworks, and Verizon Digital Media Services. In addition, a number of companies have recently entered or are currently attempting to enter our market, either directly or indirectly, as a result of the growth in the content delivery market. Some of these new entrants may become significant competitors in the future. Given the relative ease by which customers typically can switch among content delivery service providers, differentiated offerings or pricing by competitors could lead to a rapid loss of customers. Some of our current or potential competitors may bundle their offerings with other services, software or hardware in a manner that may discourage content providers from purchasing the services that we offer. In addition, we face different market characteristics and competition with local content delivery service providers as we expand internationally. Many of these international competitors are very well positioned within their local markets. Increased competition could result in price reductions and revenue shortfalls, loss of customers and loss of market share, which could harm our business, financial condition and results of operations.

We face different competitors for the other service offerings of our Orchestrate Platform. However, the competitive landscape is different from content delivery in this area in that the process of changing vendors can be more costly and complicated for the customer, which could make it difficult for us to attract new customers and increase our market share.

Many of our competitors have greater financial and sales resources than we do. Many have been offering similar services in the markets in which we compete longer than we have. We may not be able to successfully compete against these or new competitors. If we are unable to increase our customer base and increase our market share, our business, financial condition and results of operations may suffer.

##### **Our involvement in litigation may have a material adverse effect on our financial condition and operations.**

We are currently involved in multiple intellectual property lawsuits (see discussion of such lawsuits in Note 12 "Contingencies - Legal Matters" of the Notes to Consolidated Financial Statements included in Part I, Item 1 of this quarterly report on Form 10-Q).

## Table of Contents

The outcome of all litigation, including intellectual property litigation, is inherently unpredictable. If we are ultimately held liable for infringing the '703 patent in Akamai Technologies, Inc. v. Limelight Networks, Inc., it could seriously impact our ability to conduct our business and to offer our products and services to our customers. For example, a permanent injunction could prevent us from providing our content delivery services or from delivering certain types of traffic, which could impact the viability of those portions of our business. Any such finding of infringement would also harm our revenue, expenses, market share, reputation, liquidity and overall financial position. After a series of motions filed by the parties, Akamai agreed to waive its right to supplemental damages, which limited the maximum potential damages for us to approximately \$62,790 plus future accruing interest (if any), which we believe represents the upper end of our range of loss. If the district court ultimately awards damages to Akamai toward the upper end or in excess of this range, we could default on our covenants and our ability to continue as a going concern could be impaired.

If we are unsuccessful in our recently filed lawsuit against Akamai and XO Communications, which alleges that both companies infringed six of our patents we believe are critical to the effective and efficient delivery of bytes by a content delivery network, our rights to enforce such intellectual property may be impaired or we could lose some or all of our rights to such intellectual property.

We are from time to time party to other lawsuits in addition to that described above. The expenses of defending these lawsuits, particularly fees paid to our lawyers and expert consultants, have been significant to date. If the cost of prosecuting or defending current or future lawsuits continues to be significant, it may continue to adversely affect our operating results during the pendency of such lawsuits. Lawsuits also require a diversion of management and technical personnel time and attention away from other activities to pursue the defense or prosecution of such matters. In addition, adverse rulings in such lawsuits either alone or cumulatively may have an adverse impact on our revenue, expenses, market share, reputation, liquidity and financial condition.

### **Any unplanned interruption or degradation in the functioning or availability of our network or services, or attacks on or disruptions to our internal information technology systems, could lead to increased costs, a significant decline in our revenue and harm to our reputation.**

Our business is dependent on providing our customers with fast, efficient, and reliable distribution of content delivery and digital asset management services over the Internet every minute of every day. Many of our customers depend primarily or exclusively on our services to operate their businesses. Consequently, any disruption, or substantial and extensive degradation, of our services could have a material impact on our customers' businesses. Our network or services could be disrupted by numerous events, including natural disasters, failure or refusal of our third-party network providers to provide the necessary capacity or access, failure of our software or global network infrastructure and power losses. In addition, we deploy our servers in third-party co-location facilities, and these third-party co-location providers could experience system outages or other disruptions that could constrain our ability to deliver our services. We may also experience disruptions caused by software viruses, unauthorized hacking of our systems, security breaches or other cyberattacks by unauthorized users. Any hacking of our systems or other cyberattacks could lead to the unauthorized release of confidential information that could damage our customers' business and reputation, as well as our own. The economic costs to us to eliminate or alleviate cyber or other security problems, viruses, worms, malicious software programs, and other security vulnerabilities could be significant, and our efforts to address these problems may not be successful and could result in interruptions, delays, cessation of service, and loss of existing or potential customers. In addition, our release of a security-related solution may increase our visibility as a security-focused company and make us a more attractive target for attacks on our infrastructure intended to steal information about our technology, financial data, or customer information or take other actions that would be damaging to our customers and us.

We could experience a significant, unplanned disruption, or substantial and extensive degradation of our services, or our network may fail in the future. Despite our significant infrastructure investments, we may have insufficient communications and server capacity to address these or other disruptions, which could result in interruptions in our services. Any widespread interruption or substantial and extensive degradation in the functioning of our Orchestrate Platform services for any reason would reduce our revenue and could harm our business and results of operations. If such a widespread interruption occurred, or if we failed to deliver content to users as expected during a high-profile media event, game release or other well-publicized circumstance, our reputation could be damaged severely. Moreover, any disruptions, significant degradation, cybersecurity threats, security breaches, or attacks on our internal information technology systems could undermine confidence in our services and cause us to lose customers or make it more difficult to attract new ones, either of which could harm our business and results of operations.

### **We have a history of losses and we may not achieve or maintain profitability in the future.**

Since 2006, we have been profitable only one year, which was as a result of a reversal of a significant reserve for litigation. We incur significant share-based compensation expense, which has substantial impact on our results of operations.

## Table of Contents

We have also incurred, and may continue to incur, significant costs associated with litigation. Our share-based compensation expense and any material ongoing litigation costs could adversely affect our ability to achieve and maintain profitability in the future.

We also may not achieve sufficient revenue to achieve or maintain profitability and thus may continue to incur significant losses in the future for a number of reasons, including, among others:

- slowing demand for our services,
- increasing competition and competitive pricing pressures,
- any inability to provide our services in a cost-effective manner,
- the incurrence of unforeseen expenses, difficulties, complications and delays, and
- other risks described in this quarterly report on Form 10-Q.

If we fail to achieve and maintain profitability, the price of our common stock could decline, and our business, financial condition and results of operations could suffer.

### **If we are unable to sell our services at acceptable prices relative to our costs, our revenue and gross margins will decrease and our business and financial results will suffer.**

Prices for content delivery services have fallen in recent years and are likely to fall further in the future. We have invested significant amounts in purchasing capital equipment to increase the capacity of our global content delivery network. Our investments in our infrastructure are based upon our assumptions regarding future demand, as well as prices that we will be able to charge for our services. These assumptions may prove to be wrong. If the price that we are able to charge customers to deliver their content falls to a greater extent than we anticipate, if we over-estimate future demand for our services, or if our costs to deliver our services do not fall commensurate with any future price declines, we may not be able to achieve acceptable rates of return on our infrastructure investments, and our gross profit and results of operations may suffer dramatically.

As we further expand our global network and the Orchestrate Platform, and as we refresh our network equipment, we are dependent on significant future growth in demand for our services to justify additional capital expenditures. If we fail to generate significant additional demand for our services, our results of operations will suffer, and we may fail to achieve planned or expected financial results. There are numerous factors that could, alone or in combination with other factors, impede our ability to increase revenue, moderate expenses or maintain gross margins, including:

- continued price declines arising from significant competition;
- increasing settlement fees for certain peering relationships;
- failure to increase sales of our Orchestrate Platform services;
- increases in electricity, bandwidth and rack space costs or other operating expenses, and failure to achieve decreases in these costs and expenses relative to decreases in the prices we can charge for our Orchestrate Platform services and products;
- failure of our current and planned services and software to operate as expected;
- loss of any significant customers or loss of existing customers at a rate greater than our increase in new customers or our sales to existing customers;
- failure to increase sales of our Orchestrate Platform services to current customers as a result of their ability to reduce their monthly usage of our services to their minimum monthly contractual commitment;
- failure of a significant number of customers to pay our fees on a timely basis or at all or to continue to purchase our Orchestrate Platform services in accordance with their contractual commitments; and
- inability to attract high quality customers to purchase and implement our current and planned services.

A significant portion of our revenue is derived collectively from our video content management services, performance services for website and web application acceleration, and cloud storage services. These services tend to have higher gross margins than our content delivery services. We do not have a long history of offering these services, and we may not be able to achieve the growth rates in revenue from such services that we or our investors expect or have experienced in the past. If we are unable to achieve the growth rates in revenue that we expect for these service offerings, our revenue and operating results could be significantly and negatively affected.

### **If we are required to seek funding, such funding may not be available on acceptable terms or at all.**

We may need to obtain funding due to a number of factors, including a shortfall in revenue, increased expenses, final adverse judgments in litigation matters, increased investment in capital equipment or the acquisition of significant businesses or technologies. We believe that our cash, cash equivalents and marketable securities classified as current plus cash from operations will be sufficient to fund our operations and proposed capital expenditures for at least the next 12 months. However,

## Table of Contents

we may need or desire funding before such time. If we do need to obtain funding, it may not be available on commercially reasonable terms or at all. If we are unable to obtain sufficient funding, our business would be harmed. Even if we were able to find outside funding sources, we might be required to issue securities in a transaction that could be highly dilutive to our investors or we may be required to issue securities with greater rights than the securities we have outstanding today. We might also be required to take other actions that could lessen the value of our common stock, including borrowing money on terms that are not favorable to us. If we are unable to generate or raise capital that is sufficient to fund our operations, we may be required to curtail operations, reduce our capabilities or cease operations in certain jurisdictions or completely.

**We may have difficulty scaling and adapting our existing architecture to accommodate increased traffic and technology advances or changing business requirements. This could lead to the loss of customers and cause us to incur unexpected expenses to make network improvements.**

Our content delivery and other Orchestrate Platform services are highly complex and are designed to be deployed in and across numerous large and complex networks. Our global network infrastructure has to perform well and be reliable for us to be successful. The greater the user traffic and the greater the complexity of our solutions and services, the more resources we will need to invest in additional infrastructure and support. Further, as a result of our on-going litigation in the '703 patent lawsuit, we made significant investment in designing and implementing changes to our network architecture in order to implement our content delivery services in a manner we believe does not infringe the claims of Akamai's '703 patent as alleged in the February 2008 trial. We have spent and expect to continue to spend substantial amounts on the purchase and lease of equipment and data centers and the upgrade of our technology and network infrastructure to handle increased traffic over our network, implement changes to our network architecture and integrate existing solutions and to roll out new solutions and services. This expansion is expensive and complex and could result in inefficiencies, operational failures or defects in our network and related software. If we do not implement such changes or expand successfully, or if we experience inefficiencies and operational failures, the quality of our solutions and services and user experience could decline. From time to time, we have needed to correct errors and defects in our software or in other aspects of our network. In the future, there may be additional errors and defects that may harm our ability to deliver our services, including errors and defects originating with third party networks or software on which we rely. These occurrences could damage our reputation and lead to the loss of current and potential customers, which would harm our operating results and financial condition. We must continuously upgrade our infrastructure in order to keep pace with our customers' evolving demands. Cost increases or the failure to accommodate increased traffic or these evolving business demands without disruption could harm our operating results and financial condition.

**If we are unable to develop new services and enhancements to existing services or fail to predict and respond to emerging technological trends and customers' changing needs, our operating results and market share may suffer.**

The market for our Orchestrate Platform services is characterized by rapidly changing technology, evolving industry standards, and new product and service introductions. Our operating results depend on our ability to understand user preferences or predict industry changes. Our operating results also depend on our ability to modify our solutions and services on a timely basis or develop and introduce new services into existing and emerging markets. The process of developing new technologies is complex and uncertain. We must commit significant resources to developing new services or enhancements to our existing services before knowing whether our investments will result in services the market will accept. Furthermore, we may not successfully execute our technology initiatives because of errors in planning or timing, technical hurdles that we fail to overcome in a timely fashion, misunderstandings about market demand or a lack of appropriate resources. As prices for content delivery services fall, we will increasingly rely on new product offerings and other Orchestrate Platform service offerings to maintain or increase our gross margins. Failures in execution, delays in bringing new or improved products or services to market, failure to effectively integrate service offerings, or market acceptance of new services we introduce could result in competitors providing those solutions before we do, which could lead to loss of market share, revenue and earnings.

**We depend on a limited number of customers for a substantial portion of our revenue in any fiscal period, and the loss of, or a significant shortfall in demand from, these customers could significantly harm our results of operations.**

During any given fiscal period, a relatively small number of customers typically account for a significant percentage of our revenue. For the three months ended March 31, 2016, sales to our top 20 customers accounted for approximately 62% of our total revenue. During the three months ended March 31, 2016, we had no customer who represented 10% or more of our total revenue.

In the past, the customers that comprised our top 20 customers have continually changed, and we also have experienced significant fluctuations in our individual customers' usage of, or decreased usage of, our services. As a consequence, we may not be able to adjust our expenses in the short term to address the unanticipated loss of a large customer

## Table of Contents

during any particular period. As such, we may experience significant, unanticipated fluctuations in our operating results that may cause us to not meet our expectations or those of stock market analysts, which could cause our stock price to decline.

### **Rapidly evolving technologies or new business models could cause demand for our Orchestrate Platform services to decline or could cause these services to become obsolete.**

Customers, potential customers or third parties may develop technological or business model innovations that address digital delivery requirements in a manner that is, or is perceived to be, equivalent or superior to our Orchestrate Platform service offerings. This is particularly true as our customers increase their operations and begin expending greater resources on delivering their content using third party solutions. If we fail to offer content delivery, video content management and other related services that are competitive to in-sourced solutions, we may lose additional customers or fail to attract customers that may consider pursuing this in-sourced approach, and our business and financial results would suffer.

If competitors introduce new products or services that compete with or surpass the quality or the price or performance of our services, we may be unable to renew our agreements with existing customers or attract new customers at the prices and levels that allow us to generate attractive rates of return on our investment. We may not anticipate such developments and may be unable to adequately compete with these potential solutions. In addition, our customers' business models may change in ways that we do not anticipate, and these changes could reduce or eliminate our customers' needs for our services. If this occurred, we could lose customers or potential customers, and our business and financial results would suffer.

As a result of these or similar potential developments, it is possible that competitive dynamics in our market may require us to reduce our prices faster than we anticipate, which could harm our revenue, gross margin and operating results.

### **Failure to effectively enhance our sales capabilities could harm our ability to increase our customer base and achieve broader market acceptance of our services.**

Increasing our customer base and achieving broader market acceptance of our services will depend to a significant extent on our ability to enhance our sales and marketing operations. We have a concentration of our sales force at our headquarters in Tempe, Arizona, but we also have a widely deployed field sales force. We have aligned our sales resources to improve our sales productivity and efficiency and to bring our sales personnel closer to our current and potential customers. Adjustments to our sales force have been and will continue to be expensive and could cause some near-term productivity impairments. As a result, we may not be successful in improving the productivity and efficiency of our sales force, which could cause our results of operations to suffer.

We believe that there is significant competition for both inside and direct sales personnel with the sales skills and technical knowledge that we require. Our ability to achieve significant growth in revenue in the future will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of inside and direct sales personnel. New hires require significant training and, in most cases, take a significant period of time before they achieve full productivity. Our recent hires and planned hires may not become as productive as we would like, and we may be unable to hire or retain sufficient numbers of qualified individuals in the future in the markets where we do business. Our business will be seriously harmed if our sales force productivity efforts do not generate a corresponding significant increase in revenue.

### **Many of our significant current and potential customers are pursuing emerging or unproven business models, which, if unsuccessful, or ineffective at monetizing delivery of their content, could lead to a substantial decline in demand for our content delivery and other Orchestrate Platform services.**

Because the proliferation of broadband Internet connections and the subsequent monetization of content libraries for distribution to Internet users are relatively recent phenomena, many of our customers' business models that center on the delivery of rich media and other content to users remain unproven. Some of our customers will not be successful in selling advertising, subscriptions, or otherwise monetizing the content we deliver on their behalf and consequently may not be successful in creating a profitable business model. This will result in some of our customers discontinuing their Internet or web-based business operations and discontinuing use of our services and solutions. Further, any deterioration and related uncertainty in the global financial markets and economy could result in, among other things, reductions in available capital and liquidity from banks and other providers of credit, fluctuations in equity and currency values worldwide, and concerns that portions of the worldwide economy may be in a prolonged recessionary period. Any one or more of these occurrences could materially adversely impact our customers' access to capital or willingness to spend capital on our services or, in some cases, ultimately cause the customer to file for protection from creditors under applicable insolvency or bankruptcy laws or simply go out of business. This uncertainty may also impact our customers' levels of cash liquidity, which could affect their ability or willingness to timely pay for services that they will order or have already ordered from us. From time to time we discontinue service to customers for non-payment of services. We expect further customers may discontinue operations or not be willing or able to pay for services that they have ordered from us. Further loss of customers may adversely affect our financial results.

## Table of Contents

**If we are unable to attract new customers or to retain our existing customers, our revenue could be lower than expected and our operating results may suffer.**

To increase our revenue, we must add new customers and sell additional services to existing customers and encourage existing customers to increase their usage levels. If our existing and prospective customers do not perceive our services to be of sufficiently high value and quality, we may not be able to retain our current customers or attract new customers. We sell our services pursuant to service agreements that generally include some form of financial minimum commitment. Our customers have no obligation to renew their contracts for our services after the expiration of their initial commitment, and these service agreements may not be renewed at the same or higher level of service, if at all. Moreover, under some circumstances, some of our customers have the right to cancel their service agreements prior to the expiration of the terms of their agreements. Aside from minimum financial commitments, customers are not obligated to use our services for any particular type or amount of traffic. These facts, in addition to the changing competitive landscape in our market, means that we cannot accurately predict future customer renewal rates or usage rates. Our customers' renewal rates may decline or fluctuate as a result of a number of factors, including:

- their satisfaction or dissatisfaction with our services;
- the quality and reliability of our content delivery network;
- the prices of our services;
- the prices of services offered by our competitors;
- discontinuation by our customers of their Internet or web-based content distribution business;
- mergers and acquisitions affecting our customer base; and
- reductions in our customers' spending levels.

If our customers do not renew their service agreements with us, or if they renew on less favorable terms, our revenue may decline and our business may suffer. Similarly, our customer agreements often provide for minimum commitments that are often significantly below our customers' historical usage levels. Consequently, even if we have agreements with our customers to use our services, these customers could significantly curtail their usage without incurring any penalties under our agreements. In this event, our revenue would be lower than expected and our operating results could suffer.

It also is an important component of our growth strategy to market our services and solutions to particular industries or market segments. As an organization, we may not have significant experience in selling our services into certain of these markets. We have only recently begun a number of these initiatives, and our ability to successfully sell our services into these markets to a meaningful extent remains unproven. If we are unsuccessful in such efforts, our business, financial condition and results of operations could suffer.

**Rapid increase in the use of mobile and alternative devices to access the Internet present significant development and deployment challenges.**

The number of people who access the Internet through devices other than PCs, including mobile devices, game consoles and television set-top devices, has increased dramatically in the past few years. The capabilities of these devices are advancing dramatically and the increasing need to provide a high quality video experience will present us and other providers with significant challenges. If we are unable to deliver our service offerings to a substantial number of alternative device users and at a high quality, or if we are slow to develop services and technologies that are more compatible with these devices, we may fail to capture a significant share of an increasingly important portion of the market. Such a failure could limit our ability to compete effectively in an industry that is rapidly growing and changing, which, in turn, could cause our business, financial condition and results of operations to suffer.

**We need to defend our intellectual property and processes against patent or copyright infringement claims, which may cause us to incur substantial costs and threaten our ability to do business.**

Companies, organizations or individuals, including our competitors and non-practicing entities, may hold or obtain patents or other proprietary rights that would prevent, limit or interfere with our ability to make, use or sell our services or develop new services, which could make it more difficult for us to operate our business. From time to time, we may receive inquiries from holders of patents inquiring whether we infringe their proprietary rights. Companies holding Internet-related patents or other intellectual property rights are increasingly bringing suits alleging infringement of such rights or otherwise asserting their rights and seeking licenses. Any litigation or claims, whether or not valid, could result in substantial costs and diversion of resources from the defense of such claims. In addition, many of our agreements with customers require us to defend and indemnify those customers for third-party intellectual property infringement claims against them, which could result in significant additional costs and diversion of resources. If we are determined to have infringed upon a third party's intellectual property rights, we may also be required to do one or more of the following:

## Table of Contents

- cease selling, incorporating or using products or services that incorporate the challenged intellectual property;
- pay substantial damages;
- obtain a license from the holder of the infringed intellectual property right, which license may or may not be available on reasonable terms or at all; or
- redesign products or services.

If we are forced to litigate any claims or to take any of these other actions, our business may be seriously harmed.

### **Our business may be adversely affected if we are unable to protect our intellectual property rights from unauthorized use or infringement by third parties.**

We rely on a combination of patent, copyright, trademark and trade secret laws and restrictions on disclosure to protect our intellectual property rights. We have applied for patent protection in the United States and a number of foreign countries. These legal protections afford only limited protection and laws in foreign jurisdictions may not protect our proprietary rights as fully as in the United States. Monitoring infringement of our intellectual property rights is difficult, and we cannot be certain that the steps we have taken will prevent unauthorized use of our intellectual property rights. Developments and changes in patent law, such as changes in interpretations of the joint infringement standard, could restrict how we enforce certain patents we hold. We also cannot be certain that any pending or future patent applications will be granted, that any future patent will not be challenged, invalidated or circumvented, or that rights granted under any patent that may be issued will provide competitive advantages to us.

### **Our results of operations may fluctuate in the future. As a result, we may fail to meet or exceed the expectations of securities analysts or investors, which could cause our stock price to decline.**

Our results of operations may fluctuate as a result of a variety of factors, many of which are outside of our control. If our results of operations fall below the expectations of securities analysts or investors, the price of our common stock could decline substantially. In addition to the effects of other risks discussed in this section, fluctuations in our results of operations may be due to a number of factors, including, among others:

- our ability to increase sales to existing customers and attract new customers to our content delivery and other Orchestrate Platform services;
- the addition or loss of large customers, or significant variation in their use of our content delivery and other Orchestrate Platform services;
- costs associated with current or future intellectual property lawsuits and other lawsuits;
- service outages or third party security breaches to our platform or to one or more of our customers' platforms;
- the amount and timing of operating costs and capital expenditures related to the maintenance and expansion of our business, operations and infrastructure and the adequacy of available funds to meet those requirements;
- the timing and success of new product and service introductions by us or our competitors;
- the occurrence of significant events in a particular period that result in an increase in the use of our content delivery and other Orchestrate Platform services, such as a major media event or a customer's online release of a new or updated video game or operating system;
- changes in our pricing policies or those of our competitors;
- the timing of recognizing revenue;
- limitations of the capacity of our global network and related systems;
- the timing of costs related to the development or acquisition of technologies, services or businesses;
- the potential write-down or write-off of intangible or other long-lived assets;
- general economic, industry and market conditions (such as fluctuations experienced in the stock and credit markets during times of deteriorated global economic conditions) and those conditions specific to Internet usage;
- limitations on usage imposed by our customers in order to limit their online expenses; and
- war, threat of war or terrorist actions, including cyber terrorism targeted at us, our customers, or both, and inadequate cybersecurity.

We believe that our revenue and results of operations may vary significantly in the future and that period-to-period comparisons of our operating results may not be meaningful. You should not rely on the results of one period as an indication of future performance.

### **We generate our revenue primarily from the sale of content delivery services, and the failure of the market for these services to expand as we expect or the reduction in spending on those services by our current or potential customers would seriously harm our business.**

## Table of Contents

While we offer our customers a number of services and solutions associated with our Orchestrate Platform, we generate the majority of our revenue from charging our customers for the content delivered on their behalf through our global network. We are subject to an elevated risk of reduced demand for these services. Furthermore, if the market for delivery of rich media content in particular does not continue to grow as we expect or grows more slowly, then we may fail to achieve a return on the significant investment we are making to prepare for this growth. Our success, therefore, depends on the continued and increasing reliance on the Internet for delivery of media content and our ability to cost-effectively deliver these services. Many different factors may have a general tendency to limit or reduce the number of users relying on the Internet for media content, the amount of content consumed by our customers' users, or the number of providers making this content available on-line, including, among others:

- a general decline in Internet usage;
- third party restrictions on on-line content (including copyright restrictions, digital rights management and restrictions in certain geographic regions);
- system impairments or outages, including those caused by hacking or cyberattacks; and
- a significant increase in the quality or fidelity of off-line media content beyond that available online to the point where users prefer the off-line experience.

The influence of any of these or other factors may cause our current or potential customers to reduce their spending on content delivery services, which would seriously harm our operating results and financial condition.

### **We could incur charges due to impairment of goodwill and long-lived assets.**

As of March 31, 2016, we had a goodwill balance of approximately \$76,370, which is subject to periodic testing for impairment. Our long-lived assets also are subject to periodic testing for impairment. A significant amount of judgment is involved in the periodic testing. Failure to achieve sufficient levels of cash flow could result in impairment charges for goodwill or fixed asset impairment for long-lived assets, which could have a material adverse effect on our reported results of operations. Our goodwill impairment analysis also includes a comparison of the aggregate estimated fair value of our reporting unit to our total market capitalization. If our stock trades below our book value, a significant and sustained decline in our stock price and market capitalization could result in goodwill impairment charges. During times of financial market volatility, significant judgment will be used to determine the underlying cause of the decline and whether stock price declines are short-term in nature or indicative of an event or change in circumstances. Impairment charges, if any, resulting from the periodic testing are non-cash.

### **Our operations are dependent in part upon communications capacity provided by third party telecommunications providers. A material disruption of the communications capacity we have leased could harm our results of operations, reputation and customer relations.**

We lease private line capacity for our backbone from third party providers. Our contracts for private line capacity generally have terms of three to four years. The communications capacity we have leased may become unavailable for a variety of reasons, such as physical interruption, technical difficulties, contractual disputes, or the financial health of our third party providers. Alternative providers are available; however, it could be time consuming and expensive to promptly identify and obtain alternative third party connectivity. Additionally, as we grow, we anticipate requiring greater private line capacity than we currently have in place. If we are unable to obtain such capacity from third party providers on terms commercially acceptable to us or at all, our business and financial results would suffer. Similarly, if we are unable to timely deploy enough network capacity to meet the needs of our customer base or effectively manage the demand for our services, our reputation and relationships with our customers would be harmed, which, in turn, could harm our business, financial condition and results of operations.

### **We face risks associated with international operations that could harm our business.**

We have operations in numerous foreign countries and may continue to expand our sales and support organizations internationally. As part of our business strategy, we intend to expand our international network infrastructure. Expansion could require us to make significant expenditures, including the hiring of local employees, in advance of generating any revenue. As a consequence, we may fail to achieve profitable operations that will compensate our investment in international locations. We are subject to a number of risks associated with international business activities that may increase our costs, lengthen our sales cycle and require significant management attention. These risks include:

- increased expenses associated with sales and marketing, deploying services and maintaining our infrastructure in foreign countries;
- competition from local content delivery service providers, many of which are very well positioned within their local markets;

## Table of Contents

- challenges caused by distance, language and cultural differences;
- unexpected changes in regulatory requirements preventing or limiting us from operating our global network or resulting in unanticipated costs and delays;
- interpretations of laws or regulations that would subject us to regulatory supervision or, in the alternative, require us to exit a country, which could have a negative impact on the quality of our services or our results of operations;
- longer accounts receivable payment cycles and difficulties in collecting accounts receivable;
- corporate and personal liability for violations of local laws and regulations;
- currency exchange rate fluctuations and repatriation of funds;
- potentially adverse tax consequences;
- credit risk and higher levels of payment fraud; and
- foreign exchange controls that might prevent us from repatriating cash earned in countries outside the United States.

International operations are subject to significant additional risks not generally faced in our domestic operations, including, but not limited to, risks relating to legal systems that may not adequately protect contract and intellectual property rights, policies and taxation, the physical infrastructure of the country, as well as risks relating to potential political turmoil and currency exchange controls. There can be no assurance that these international risks will not materially adversely affect our business. For example, our operations include software development and quality assurance activities in Ukraine, which is currently experiencing a period of social unrest. Should there be significant productivity losses, or if we become unable to conduct operations in Ukraine in the future, and our contingency plans are unsuccessful in addressing the related risks, our business could be adversely affected.

### **Our business depends on continued and unimpeded access to third party controlled end-user access networks.**

Our content delivery services depend on our ability to access certain end-user access networks in order to complete the delivery of rich media and other on-line content to end-users. Some operators of these networks may take measures that could degrade, disrupt or increase the cost of our or our customers' access to certain of these end-user access networks. Such measures may include restricting or prohibiting the use of their networks to support or facilitate our services, or charging increased fees to us, our customers or end-users in connection with our services. In 2015, the U.S. Federal Communications Commission (FCC) released new network neutrality and open internet rules that reclassified broadband Internet access services as a telecommunications service subject to some elements of common carrier regulation. Among other things, the FCC order prohibits blocking or discriminating against lawful services and applications and prohibits "paid prioritization," or providing faster speeds or other benefits in return for compensation. Nevertheless, the rules are subject to legal challenges, and if they are overturned, we or our customers could experience increased cost or slower data on these third-party networks. If we or our customers experience increased cost in delivering content to end users, or otherwise, or if end users perceive a degradation of quality, our business and that of our customers may be significantly harmed. This or other types of interference could result in a loss of existing customers, increased costs and impairment of our ability to attract new customers, thereby harming our revenue and growth.

In addition, the performance of our infrastructure depends in part on the direct connection of our global network to a large number of end-user access networks, known as peering, which we achieve through mutually beneficial cooperation with these networks. In some instances, network operators charge us for the peering connections. If, in the future, a significant percentage of these network operators elected to no longer peer with our network or peer with our network on less favorable economic terms, then the performance of our infrastructure could be diminished, our costs could increase and our business could suffer.

### **If our ability to deliver media files in popular proprietary content formats was restricted or became cost-prohibitive, demand for our content delivery services could decline, we could lose customers and our financial results could suffer.**

Our business depends on our ability to deliver media content in all major formats. If our legal right or technical ability to store and deliver content in one or more popular proprietary content formats, such as HTTP Live Streaming and Multimedia Messaging Services, was limited, our ability to serve our customers in these formats would be impaired and the demand for our content delivery and other Orchestrate Platform services would decline by customers using these formats. Owners of propriety content formats may be able to block, restrict or impose fees or other costs on our use of such formats, which could lead to additional expenses for us and for our customers, or which could prevent our delivery of this type of content altogether. Such interference could result in a loss of existing customers, increased costs and impairment of our ability to attract new customers, which would harm our revenue, operating results and growth.

### **We use certain "open-source" software the use of which could result in our having to distribute our proprietary software, including our source code, to third parties on unfavorable terms, which could materially affect our business.**

## Table of Contents

Certain of our service offerings use software that is subject to open-source licenses. Open-source code is software that is freely accessible, usable and modifiable. Certain open-source code is governed by license agreements, the terms of which could require users of such open-source code to make any derivative works of such open-source code available to others on unfavorable terms or at no cost. Because we use open-source code, we may be required to take remedial action to protect our proprietary software. Such action could include replacing certain source code used in our software, discontinuing certain of our products or features or taking other actions that could divert resources away from our development efforts.

In addition, the terms relating to disclosure of derivative works in many open-source licenses are unclear. We periodically review our compliance with the open-source licenses we use and do not believe we will be required to make our proprietary software freely available. Nevertheless, if a court interprets one or more such open-source licenses in a manner that is unfavorable to us, we could be required to make some components of our software available at no cost, which could materially and adversely affect our business and financial condition.

### **If we are unable to retain our key employees and hire qualified sales and technical personnel, our ability to compete could be harmed.**

Our future success depends upon the continued services of our executive officers and other key technology, sales, marketing and support personnel who have critical industry experience and relationships that they rely on in implementing our business plan. There is increasing competition for talented individuals with the specialized knowledge to deliver Orchestrate Platform services and this competition affects both our ability to retain key employees and hire new ones. Historically, we have experienced a significant amount of employee turnover, especially with respect to our sales personnel. As a result, a significant number of our sales personnel are relatively new and may need time to become fully productive. The loss of the services of any of our key employees could disrupt our operations, delay the development and introduction of our services, and negatively impact our ability to sell our services.

### **We are subject to the effects of fluctuations in foreign exchange rates, which could affect our operating results.**

The financial condition and results of operations of our operating foreign subsidiaries are reported in the relevant local currency and are then translated into U.S. dollars at the applicable currency exchange rate for inclusion in our consolidated U.S. dollar financial statements. Also, although a large portion of our customer and vendor agreements are denominated in U.S. dollars, we may be exposed to fluctuations in foreign exchange rates with respect to customer agreements with certain of our international customers. Exchange rates between these currencies and U.S. dollars in recent years have fluctuated significantly and may do so in the future. In addition to currency translation risk, we incur currency transaction risk whenever one of our operating subsidiaries enters into a transaction using a different currency than the relevant local currency. Given the volatility of exchange rates, we may be unable to manage our currency transaction risks effectively. Currency fluctuations could have a material adverse effect on our future international sales and, consequently, on our financial condition and results of operations.

### **As part of our business strategy, we may acquire businesses or technologies and may have difficulty integrating these operations.**

We have completed a number of business acquisitions and may seek to acquire businesses or technologies that are complementary to our business in the future. Acquisitions are often complex and involve a number of risks to our business, including, among others;

- the difficulty of integrating the operations, services, solutions and personnel of the acquired companies;
- the potential disruption of our ongoing business;
- the potential distraction of management;
- the possibility that our business culture and the business culture of the acquired companies will not be compatible;
- the difficulty of incorporating or integrating acquired technology and rights with or into our other services and solutions;
- expenses related to the acquisition and to the integration of the acquired companies;
- the impairment of relationships with employees and customers as a result of any integration of new personnel;
- employee turnover from the acquired companies or from our current operations as we integrate businesses;
- risks related to the businesses of acquired companies that may continue to impact the businesses following the merger; and
- potential unknown liabilities associated with acquired companies.

Any inability to integrate services, solutions, operations or personnel in an efficient and timely manner could harm our results of operations.

## Table of Contents

If we are not successful in completing acquisitions that we may pursue in the future, we may be required to reevaluate our business strategy, and we may incur substantial expenses and devote significant management time and resources without a productive result. In addition, future acquisitions will require the use of our available cash or dilutive issuances of securities. Future acquisitions or attempted acquisitions could also harm our ability to achieve profitability.

### **Internet-related and other laws relating to taxation issues, privacy, data security and consumer protection and liability for content distributed over our network, could harm our business.**

Laws and regulations that apply to communications and commerce conducted over the Internet are becoming more prevalent, both in the United States and internationally, and may impose additional burdens on companies conducting business on-line or providing Internet-related services such as ours. Increased regulation could negatively affect our business directly, as well as the businesses of our customers, which could reduce their demand for our services. For example, tax authorities abroad may impose taxes on the Internet-related revenue we generate based on where our internationally deployed servers are located. In addition, domestic and international taxation laws are subject to change. Our services, or the businesses of our customers, may become subject to increased taxation, which could harm our financial results either directly or by forcing our customers to scale back their operations and use of our services in order to maintain their operations. Also, the Communications Act of 1934, as amended by the Telecommunications Act of 1996 (the Act), and the regulations promulgated by the FCC under Title II of the Act, may impose obligations on the Internet and those participants involved in Internet-related businesses. In addition, the laws relating to the liability of private network operators for information carried on, processed by or disseminated through their networks are unsettled, both in the United States and abroad. Network operators have been sued in the past, sometimes successfully, based on the content of material disseminated through their networks. We may become subject to legal claims such as defamation, invasion of privacy and copyright infringement in connection with content stored on or distributed through our network. In addition, our reputation could suffer as a result of our perceived association with the type of content that some of our customers deliver. If we need to take costly measures to reduce our exposure to the risks posed by laws and regulations that apply to communications and commerce conducted over the Internet, or are required to defend ourselves against related claims, our financial results could be negatively affected.

Several other federal laws also could expose us to liability and impose significant additional costs on us. For example, the Digital Millennium Copyright Act has provisions that limit, but do not eliminate, our liability for the delivery of customer content that infringe copyrights or other rights, so long as we comply with certain statutory requirements. In addition, the Children’s On-line Privacy Protection Act restricts the ability of on-line services to collect information from minors and the Protection of Children from Sexual Predators Act of 1998 requires on-line service providers to report evidence of violations of federal child pornography laws under certain circumstances. Also, there are emerging regulation and industry standards regarding the collection and use of personal information and protecting the security of data on networks. Compliance with these laws, regulations and standards is complex and any failure on our part to comply with these regulations may subject us to additional liabilities.

### **Privacy concerns could lead to legislative and other limitations on our ability to use “cookies” and video player “cookies” that are crucial to our ability to provide services to our customers.**

Our ability to compile data for customers depends on the use of “cookies” and video player “cookies” to identify certain on-line behavior that allows our customers to measure a website or video’s effectiveness. A cookie is a small file of information stored on a user’s computer that allows us to recognize that user’s browser or video player when the user makes a request for a web page or to play a video. Government authorities inside the United States concerned with the privacy of Internet users have suggested limiting or eliminating the use of cookies. Bills aimed at regulating the collection and use of personal data from Internet users are currently pending in United States Congress and many state legislatures. Attempts at such regulation may be drafted in such a way as to limit or prohibit the use of technology like cookies, thereby creating restrictions that could reduce our ability to use them. In addition, the Federal Trade Commission and the Department of Commerce have conducted hearings regarding user profiling, the collection of non-personally identifiable information and on-line privacy.

Our foreign operations may also be adversely affected by regulatory action outside the United States. For example, the European Union has adopted a directive addressing data privacy that limits the collection, disclosure and use of information regarding European Internet users. We have in the past relied on adherence to the Department of Commerce’s Safe Harbor Privacy Principles and compliance with the U.S.-EU and U.S.-Swiss Safe Harbor Frameworks as agreed to and set forth by the Department of Commerce, and the European Union and Switzerland, which established a means for legitimating the transfer of personally identifiable information by U.S. companies doing business in Europe from the European Economic Area to the U.S. As a result of the October 6, 2015 European Union Court of Justice (ECJ) opinion in Case C-362/14 (Schrems v. Data Protection Commissioner) regarding the adequacy of the U.S.-EU Safe Harbor Framework, the U.S.-EU Safe Harbor Framework is no longer deemed to be a valid method of compliance with the restrictions set forth in the data privacy directive (and member states’ implementations thereof) regarding the transfer of data outside of the European Economic Area. In light of

## Table of Contents

the ECJ opinion in Case C-362/14, we anticipate engaging in efforts to legitimize data transfers from the European Economic Area. We may be unsuccessful in establishing legitimate means of transferring data from the European Economic Area for some of our service offerings, we may experience hesitancy, reluctance, or refusal by European or multi-national customers to continue to use our services due to the potential risk exposure to such customers as a result of the ECJ ruling, and we and our customers are at risk of enforcement actions taken by an EU data protection authority until such point in time that we ensure that all data transfers to us from the European Economic Area are legitimized. If we determine that it is necessary to establish systems to maintain EU-origin data in the European Economic Area, this may require us to incur substantial expense and distract from other aspects of our business. We publicly post our privacy policies and practices concerning our processing, use and disclosure of personally identifiable information. Our publication of our privacy policy and other statements we publish that provide promises and assurances about privacy and security can subject us to potential state and federal action if they are found to be deceptive or misrepresentative of our practices.

In addition, the European Union has enacted an electronic communications directive that imposes certain restrictions on the use of cookies and also places restrictions on the sending of unsolicited communications. Each European Union member country was required to enact legislation to comply with the provisions of the electronic communications directive. Germany has also enacted additional laws limiting the use of user profiling, and other countries, both in and out of the European Union, may impose similar limitations.

Internet users may directly limit or eliminate the placement of cookies on their computers by using third-party software that blocks cookies, or by disabling or restricting the cookie functions of their Internet browser software and in their video player software. Internet browser software upgrades also may result in limitations on the use of cookies. Technologies like the Platform for Privacy Preferences Project may limit collection of cookies. Plaintiffs' attorneys also have organized class action suits against companies related to the use of cookies and several companies, including companies in the Internet advertising industry, have had claims brought against them before the Federal Trade Commission regarding the collection and use of Internet user information. We may be subject to such suits in the future, which could limit or eliminate our ability to collect such information. If our ability to use cookies were substantially restricted due to the foregoing, or for any other reason, we would have to generate and use other technology or methods that allow the gathering of user data in order to provide services to customers. This change in technology or methods could require significant re-engineering time and resources, and may not be complete in time to avoid negative consequences to our business. In addition, alternative technology or methods might not be available on commercially reasonable terms, if at all. If the use of cookies is prohibited and we are not able to efficiently and cost effectively create new technology, our business, financial condition and results of operations would be materially adversely affected. In addition, any compromise of security that results in the release of Internet users' and/or our customers' data could seriously limit the adoption of our service offerings as well as harm our reputation and brand, expose us to liability and subject us to reporting obligations under various state laws, which could have an adverse effect on our business. The risk that these types of events could seriously harm our business is likely to increase as the amount of data stored for customers on our servers and the number of countries where we operate has been increasing, and we may need to expend significant resources to protect against security breaches, which could have an adverse effect on our business, financial condition or results of operations.

### **Our business requires the continued development of effective business support systems to support our customer growth and related services.**

The growth of our business depends on our ability to continue to develop effective business support systems. This is a complicated undertaking requiring significant resources and expertise. Business support systems are needed for:

- implementing customer orders for services;
- delivering these services; and
- timely and accurate billing for these services.

Because our business plan provides for continued growth in the number of customers that we serve and services offered, there is a need to continue to develop our business support systems on a schedule sufficient to meet proposed service roll-out dates. The failure to continue to develop effective business support systems could harm our ability to implement our business plans and meet our financial goals and objectives.

### **We have incurred, and will continue to incur significant costs as a result of operating as a public company, and our management is required to devote substantial time to compliance initiatives.**

As a public company, we have incurred, and will continue to incur, significant expenses, including accounting, legal and other professional fees, insurance premiums, investor relations costs, and costs associated with compensating our independent directors. In addition, rules implemented by the SEC and the Nasdaq Global Select Market impose additional requirements on public companies, including requiring changes in corporate governance practices. For example, the listing

## Table of Contents

requirements of the Nasdaq Global Select Market require that we satisfy certain corporate governance requirements relating to independent directors, audit committees, distribution of annual and interim reports, stockholder meetings, stockholder approvals, solicitation of proxies, conflicts of interest, stockholder voting rights and codes of conduct. Our management and other personnel need to devote a substantial amount of time to these compliance initiatives. Moreover, these rules and regulations increase our legal and financial compliance costs and make some activities more time-consuming and costly. For example, these rules and regulations make it more difficult and more expensive for us to obtain director and officer liability insurance.

**If the accounting estimates we make, and the assumptions on which we rely, in preparing our financial statements prove inaccurate, our actual results may be adversely affected.**

Our financial statements have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments about, among other things, taxes, revenue recognition, share-based compensation costs, contingent obligations and doubtful accounts. These estimates and judgments affect the reported amounts of our assets, liabilities, revenue and expenses, the amounts of charges accrued by us, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances and at the time they are made. If our estimates or the assumptions underlying them are not correct, we may need to accrue additional charges or reduce the value of assets that could adversely affect our results of operations, investors may lose confidence in our ability to manage our business and our stock price could decline.

**If we fail to maintain proper and effective internal controls or fail to implement our controls and procedures with respect to acquired or merged operations, our ability to produce accurate financial statements could be impaired, which could adversely affect our operating results, our ability to operate our business and investors' views of us.**

We must ensure that we have adequate internal financial and accounting controls and procedures in place so that we can produce accurate financial statements on a timely basis. We are required to spend considerable effort on establishing and maintaining our internal controls, which is costly and time-consuming and needs to be re-evaluated frequently.

We have operated as a public company since June 2007, and we will continue to incur significant legal, accounting and other expenses as we comply with the Sarbanes-Oxley Act of 2002, as well as new rules implemented from time to time by the SEC and the Nasdaq Global Select Market. These rules impose various requirements on public companies, including requiring changes in corporate governance practices, increased reporting of compensation arrangements and other requirements. Our management and other personnel will continue to devote a substantial amount of time to these compliance initiatives. Moreover, new rules and regulations will likely increase our legal and financial compliance costs and make some activities more time-consuming and costly. These rules and regulations could also make it more difficult for us to attract and retain qualified persons to serve on our board of directors, our board committees or as executive officers.

Section 404 of the Sarbanes-Oxley Act of 2002 requires that we include in our annual report our assessment of the effectiveness of our internal control over financial reporting and our audited financial statements as of the end of each fiscal year. Furthermore, our independent registered public accounting firm, Ernst & Young LLP (EY), is required to report on whether it believes we maintained, in all material respects, effective internal control over financial reporting as of the end of the year. Our continued compliance with Section 404 will require that we incur substantial expense and expend significant management time on compliance related issues, including our efforts in implementing controls and procedures related to acquired or merged operations. We currently do not have an internal audit group and use an international accounting firm to assist us with our assessment of the effectiveness of our internal controls over financial reporting. In future years, if we fail to timely complete this assessment, or if EY cannot timely attest, there may be a loss of public confidence in our internal controls, the market price of our stock could decline, and we could be subject to regulatory sanctions or investigations by the Nasdaq Global Select Market, the SEC or other regulatory authorities, which would require additional financial and management resources. In addition, any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or cause us to fail to timely meet our regulatory reporting obligations.

**Changes in financial accounting standards or practices may cause adverse, unexpected financial reporting fluctuations and affect our reported results of operations.**

A change in accounting standards or practices can have a significant effect on our operating results and may affect our reporting of transactions completed before the change is effective. New accounting pronouncements and varying interpretations of existing accounting pronouncements have occurred and may occur in the future. Changes to existing rules or the questioning of current practices may adversely affect our reported financial results or the way we conduct our business.

## Table of Contents

**Divestiture of our businesses or product lines, including those that we have acquired or will acquire, may materially adversely affect our financial condition, results of operations or cash flows, or may result in impairment charges that may adversely affect our results of operations.**

Divestitures involve risks, including difficulties in the separation of operations, services, products and personnel, the diversion of management's attention from other business concerns, the disruption of our business, the potential loss of key employees and the retention of uncertain contingent liabilities related to the divested business, any of which could result in a material adverse effect to our financial condition, results of operations or cash flows. Divestitures of previously acquired businesses may result in significant asset impairment charges, including those related to goodwill and other intangible assets, which could have a material adverse effect on our financial condition and results of operations. Future impairment may result from, among other things, deterioration in the performance of the acquired business or product line, adverse market conditions and changes in the competitive landscape, adverse changes in applicable laws or regulations, including changes that restrict the activities of the acquired business or product line, changes in accounting rules and regulations, and a variety of other circumstances. The amount of any impairment is recorded as a charge to the statement of operations. We may never realize the full value of our goodwill and intangible assets, and any determination requiring the write-off of a significant portion of these assets may have an adverse effect on our financial condition and results of operations. We cannot assure you that we will be successful in managing these or any other significant risks that we encounter in divesting a business or product line.

### **Risks Related to Ownership of Our Common Stock**

**The trading price of our common stock has been, and is likely to continue to be, volatile.**

The trading prices of our common stock and the securities of technology companies generally have been highly volatile. Factors affecting the trading price of our common stock will include:

- variations in our operating results;
- announcements of technological innovations, new services or service enhancements, strategic alliances or significant agreements by us or by our competitors;
- commencement or resolution of, our involvement in and uncertainties arising from, litigation, particularly our current litigation with Akamai and MIT;
- recruitment or departure of key personnel;
- changes in the estimates of our operating results or changes in recommendations by any securities analysts that elect to follow our common stock;
- developments or disputes concerning our intellectual property or other proprietary rights;
- the gain or loss of significant customers;
- market conditions in our industry, the industries of our customers and the economy as a whole; and
- adoption or modification of regulations, policies, procedures or programs applicable to our business.

In addition, if the market for technology stocks or the stock market in general experiences loss of investor confidence, the trading price of our common stock could decline for reasons unrelated to our business, operating results or financial condition. The trading price of our common stock might also decline in reaction to events or speculation of events that affect other companies in our industry even if these events do not directly affect us.

**If securities or industry analysts do not publish research or reports about our business or if they issue an adverse or misleading opinion or report, our stock, our stock price and trading volume could decline.**

The trading market for our common stock will be influenced by the research and reports that industry or securities analysts publish about us or our business. If any of the analysts who cover us issue an adverse or misleading opinion regarding our stock, our stock price would likely decline. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

**Insiders have substantial control over us and will be able to influence corporate matters.**

As of March 31, 2016, our directors and executive officers and their affiliates beneficially owned, in the aggregate, approximately 32% of our outstanding common stock, including approximately 29% beneficially owned by investment entities affiliated with Goldman, Sachs & Co. These stockholders are able to exercise significant influence over all matters requiring

## Table of Contents

stockholder approval, including the election of directors and approval of significant corporate transactions, such as a merger or other sale of our company or its assets. This concentration of ownership could limit other stockholders' ability to influence corporate matters and may have the effect of delaying or preventing a third party from acquiring control over us.

### **Future equity issuances or a sale of a substantial number of shares of our common stock may cause the price of our common stock to decline.**

Because we may need to raise additional capital in the future to continue to expand our business and our research and development activities, among other things, we may conduct additional equity offerings. If we or our stockholders sell substantial amounts of our common stock (including shares issued upon the exercise of options and warrants) in the public market, the market price of our common stock could fall. A decline in the market price of our common stock could make it more difficult for us to sell equity or equity-related securities in the future at a time and price that we deem appropriate.

### **Anti-takeover provisions in our charter documents and Delaware law could discourage, delay or prevent a change in control of our company and may affect the trading price of our common stock.**

Provisions of our amended and restated certificate of incorporation and bylaws, as well as provisions of Delaware law, could make it more difficult for a third party to acquire us, even if doing so would benefit our stockholders. These provisions:

- establish that members of the board of directors may be removed only for cause upon the affirmative vote of stockholders owning a majority of our capital stock;
- authorize the issuance of "blank check" preferred stock that could be issued by our board of directors to increase the number of outstanding shares and thwart a takeover attempt;
- limit who may call special meetings of stockholders;
- prohibit stockholder action by written consent, thereby requiring stockholder actions to be taken at a meeting of the stockholders;
- establish advance notice requirements for nominations for election to the board of directors or for proposing matters that can be acted upon at stockholder meetings;
- provide for a board of directors with staggered terms; and
- provide that the authorized number of directors may be changed only by a resolution of our board of directors.

In addition, Section 203 of the Delaware General Corporation Law, which imposes certain restrictions relating to transactions with major stockholders, may discourage, delay or prevent a third party from acquiring us.

### **Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

Not applicable

### **Item 3. Defaults upon Senior Securities**

Not applicable

### **Item 4. Mine Safety Disclosures**

Not applicable

### **Item 5. Other Information**

None.

**Section 2: EX-10.1 (EXHIBIT 10.1)**

**LIMELIGHT NETWORKS, INC.**

**FIRST AMENDMENT TO EMPLOYMENT AGREEMENT**

This First Amendment to the Employment Agreement (the "Amendment") is made effective as of February 23, 2016 (the "Effective Date"), by and between Limelight Networks, Inc. (the "Company") and Robert Lento (the "Executive").

**RECITALS**

A. The Company and Executive entered into that certain Employment Agreement dated as of January 22, 2013 (the "Agreement"); and

B. The Company and Executive desire to amend the Agreement to modify certain existing aspects of Executive's employment with the Company. Defined terms used in this Amendment identified with an initial capital letter have the meaning given such terms in the Agreement.

**NOW, THEREFORE**, the Company and Executive agree that in consideration of the foregoing and the promises and covenants contained herein, the parties agree as follows:

**AGREEMENT**

1. Severance. Section 7(b) of the Agreement is modified to read in its entirety as follows:

(b) Termination Without Cause or Resignation for Good Reason in Connection with a Change of Control. If Executive's employment is terminated by the Company without Cause or Executive terminates voluntarily for Good Reason and the termination is in Connection with a Change of Control, then, subject to Section 8, Executive will receive: (i) continued payment of Executive's Base Salary for the year in which the termination occurs (subject to applicable tax withholdings), for twenty four (24) months, such amounts to be paid in accordance with the Company's normal payroll policies; (ii) the payment in an amount equal to 200% of Executive's Target Annual Incentive for the year in which the termination occurs (subject to applicable tax withholdings), such amounts to be paid in accordance with the Company's normal payroll policies over the course of twenty four (24) months; (iii) 100% of Executive's then outstanding unvested Equity Awards will vest, and (iv) reimbursement for premiums paid for continued health benefits for Executive (and any eligible dependents) under the Company's health plans until the earlier of (A) twelve (12) months, payable when such premiums are due (provided Executive validly elects to continue coverage under COBRA), or (B) the date upon which Executive and Executive's eligible dependents become covered under similar plans.

2. Full Force and Effect. To the extent not expressly amended hereby, the Agreement remains in full force and effect.

**IN WITNESS WHEREOF**, the undersigned parties have caused this Amendment to be executed as of the date first set forth above.

**SECOND AMENDMENT TO EMPLOYMENT AGREEMENT**

This Second Amendment to the Employment Agreement (the “Amendment”) is made effective as of February 23, 2016 (the “Effective Date”), by and between Limelight Networks, Inc. (the “Company”) and Sajid Malhotra (the “Executive”).

**RECITALS**

A. The Company and Executive entered into that certain Employment Agreement dated as of March 24, 2014 and the First Amendment to the Employment Agreement dated as of January 1, 2015 (collectively, the “Agreement”); and

B. The Company and Executive desire to amend the Agreement to modify certain existing aspects of Executive’s employment with the Company. Defined terms used in this Amendment identified with an initial capital letter have the meaning given such terms in the Agreement.

**NOW, THEREFORE**, the Company and Executive agree that in consideration of the foregoing and the promises and covenants contained herein, the parties agree as follows:

**AGREEMENT**

1. Severance. Section 7(b) of the Agreement is modified to read in its entirety as follows:

(b) Termination Without Cause or Resignation for Good Reason in Connection with a Change of Control. If Executive’s employment is terminated by the Company without Cause or Executive terminates voluntarily for Good Reason and the termination is in

Connection with a Change of Control, then, subject to Section 8, Executive will receive: (i) continued payment of Executive's Base Salary for the year in which the termination occurs (subject to applicable tax withholdings), for twenty four (24) months, such amounts to be paid in accordance with the Company's normal payroll policies; (ii) the payment in an amount equal to 200% of Executive's Target Annual Incentive for the year in which the termination occurs (subject to applicable tax withholdings), such amounts to be paid in accordance with the Company's normal payroll policies over the course of twenty four (24) months; (iii) 100% of Executive's then outstanding unvested Equity Awards will vest, and (iv) reimbursement for premiums paid for continued health benefits for Executive (and any eligible dependents) under the Company's health plans until the earlier of (A) twelve (12) months, payable when such premiums are due (provided Executive validly elects to continue coverage under COBRA), or (B) the date upon which Executive and Executive's eligible dependents become covered under similar plans.

2. Full Force and Effect. To the extent not expressly amended hereby, the Agreement remains in full force and effect.

**IN WITNESS WHEREOF**, the undersigned parties have caused this Amendment to be executed as of the date first set forth above.

## Section 7: EX-10.6 (EXHIBIT 10.6)

# 2016-2017 RETENTION BONUS PLAN AGREEMENT

## Limelight Networks 2016-2017 RETENTION BONUS PLAN AGREEMENT

Bonus Participant:   «First\_Name» «Last\_Name»

### I. 2016-2017 RETENTION BONUS PLAN AGREEMENT Overview

**Introduction.** The Limelight Networks 2016-2017 RETENTION BONUS PLAN is designed to help ensure stability in the senior leadership team and to create additional incentives to meet Limelight's profitability goals for 2016 and 2017. Participation in this retention bonus plan is a one-time program and is separate from, and supplemental to, any 2016 or 2017 Management Bonus Plan that may be implemented for fiscal year 2016 and 2017. This 2016-2017 RETENTION BONUS PLAN is adopted pursuant to and is subject to terms of the Limelight Networks, Inc. Master Management & Executive Bonus Plan (collectively, the "Plan" or "Retention Plan"). THIS RETENTION BONUS IS SUBJECT TO ALL TERMS AND CONDITIONS OF THIS PLAN AGREEMENT, INCLUDING THE DISPUTE RESOLUTION PROVISIONS SET FORTH IN SECTION VII OF THIS PLAN AGREEMENT. BY SIGNING YOUR NAME BELOW, YOU SHALL HAVE CONFIRMED YOUR ACCEPTANCE OF THE TERMS AND CONDITIONS OF THIS PLAN AGREEMENT.

**Performance Periods.** The Retention Plan consists of two Performance Periods lasting the entire 2016 and 2017 fiscal years respectively.

**Performance Criteria.** Each Participant may earn double the bonus otherwise payable to him or her for fiscal 2016 and 2017 service (each a "Retention Bonus"). Double bonus payment will be made for achievement under the 2016 Management Bonus Plan if: (i) Limelight's stock price is less than \$3.00 per share for more than 30 trading days in the fourth quarter, (ii) Limelight ends the year with more than \$70 million in cash (not including board approved non-ordinary use of cash, such as a stock buyback or legal settlement), and (iii) the Participant is employed with Limelight through the payment date. The Retention Plan achievement component for 2017 will be determined in connection with fiscal year 2017 budgeting process. The Participant will also be eligible to earn double the bonus otherwise payable to him or her under the 2017 Management Bonus Plan.

**Payment in stock or cash.** The Participant may also elect at the time of payment whether to take the additional payment in cash, stock, or some combination thereof. If payment in stock is elected, there is no vesting period for the shares.

### II. Bonus Payments. Each payment of the Retention Bonus, if any, will be made after Limelight's 2016 and 2017 financial results have been

reviewed and approved by the Audit Committee of the Board and the calculation and payment of the bonus amounts, if any, have been reviewed and approved by the Compensation Committee of the Board. Payment, if any, will likely occur in February 2016 and 2017 respectively, but will be paid no later than March 15, 2017 and March 15, 2018 respectively. To be eligible to receive a bonus payment, the Participant must be employed with Limelight through the payment date. Employees terminating prior to end of the year **will not** be entitled to a partial or pro-rated bonus amount. The Participant may also elect at the time of payment whether to take the additional payment in cash, stock, or some combination thereof. If payment in stock is elected, there is no vesting period for the shares.

### III. **Retention Bonus Award**

#### *Conditions to Payment of Retention Bonus.*

For fiscal 2016, if (i) Limelight's stock price is less than \$3.00 per share for more than 30 trading days in the fourth quarter, (ii) Limelight ends the year with more than \$70 million in cash (not including board approved non-ordinary use of cash, such as a stock buyback or legal settlement), and (iii) the Participant is employed with Limelight through the payment date, then the Participant will be entitled to receive double the bonus otherwise payable to him or her under the 2016 Management Bonus Plan. The Retention Program achievement component for 2017 will be determined in connection with fiscal year 2017 budgeting process. The Participant will also be eligible to earn double the bonus otherwise payable to him or her under the 2017 Management Bonus Plan.

The Retention Bonus will be paid if and only if the Participant (a) signs and returns a copy of this Award Agreement and (b) the three conditions described in the preceding paragraph are satisfied.

IV. **Non-Transferability of Award.** This Award Agreement or rights to the Retention Bonus may not be sold, assigned, alienated, transferred, pledged, attached or otherwise encumbered, and any purported sale, assignment, alienation, transfer, pledge, attachment or other encumbrance of the Retention Bonus in violation of the provisions of this Section IV.

V. **Withholding.** Limelight shall deduct from the Retention Bonus payable to you all applicable federal, state and local income and employment taxes and other taxes and withholding required by law.

VI. **Successors and Assigns of the Company.** The terms and conditions of this Award Agreement shall be binding upon and shall inure to the benefit of Limelight and its successors and assigns.

### VII. **Plan Disputes**

If the Participant disputes or protests the administration or interpretation of this Plan, the Participant agrees that the dispute shall be resolved as follows:

- The Participant must dispute or protest by written notice to the CEO within thirty (30) days of the events giving rise to the dispute or protest.
- Interpretation of this Plan by CEO will be final and binding.
- The Participant agrees to keep confidential the existence of, and any information concerning, a dispute described in this Section VII, except that the Participant may disclose information concerning such dispute to the court that is considering such dispute or to his or her legal counsel (provided that such counsel agrees not to disclose any such information other than as necessary to the prosecution or defense of the dispute).

VIII. **Governing Law.** This Award Agreement shall be deemed to be made in the State of Arizona, and the validity, construction and effect of this Award Agreement in all respects shall be determined in accordance with the laws of the State of Arizona, without giving effect to the conflict of law principles thereof.

IX. **Headings and Construction.** Headings are given to the Sections and subsections of this Award Agreement solely as a convenience to facilitate reference. Such headings shall not be deemed in any way material or relevant to the construction or interpretation of this Award Agreement or any provision thereof. Whenever the words "include", "includes" or "including" are used in this Award Agreement, they shall be deemed to be followed by the words "but not limited to". The term "or" is not exclusive.

X. **Amendment of this Award Agreement.** The Compensation Committee may waive any conditions or rights under, amend any terms of, or alter, suspend, discontinue, cancel or terminate this Award Agreement prospectively or retroactively; provided, however, that any such waiver, amendment, alteration, suspension, discontinuance, cancellation or termination that would materially and adversely impair the Participant's rights hereunder shall not to that extent be effective without Participant's consent.

XI. **Counterparts.** This Award Agreement may be signed in counterparts, each of which shall be an original, with the same effect as if the signatures thereto and hereto were upon the same instrument.

### XII. **Acknowledgement**

Please return one signed copy of this document to Kate Garcia.

**I have read, understand, and agree to abide by all the terms and conditions of this Agreement.**

## Section 8: EX-31.1 (EXHIBIT 31.1)

**EXHIBIT 31.1**

### CERTIFICATION OF PRINCIPAL EXECUTIVE OFFICER

I, Robert A. Lento, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Limelight Networks, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

## Section 9: EX-31.2 (EXHIBIT 31.2)

EXHIBIT 31.2

### CERTIFICATION OF PRINCIPAL FINANCIAL OFFICER

I, Sajid Malhotra, certify that:

1. I have reviewed this quarterly report on Form 10-Q of Limelight Networks, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
  - (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
  - (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
  - (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
  - (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
  - (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
  - (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
