MSR VALUE STABLE AT 100 BPS

- The Company reported a negative mark-to-market of \$29 mm largely driven by a decline in interest rates, offset by a \$46 million preliminary estimate of revenues for loans exiting forbearance
- As of September 30, 2020 a 25-bp downward shock to rates would result in a \$106 million mark-to-market charge

+25 bps	729.7	43%
Current rate	819.7	48%

- We expect single-digit portfolio growth in 4Q'20 on new subservicing relationship and further ramp in correspondent volumes

Total CPR

Portfolio Composition

SERVICING MARGIN IMPACTED BY LOW INTEREST RATES

Servicing Margin (bps)⁽¹⁾

- Servicing margin compressed to (0.1) bps due to the impact of low interest rates, including higher amortization and reduced interest income on custodial deposits, offset by investor settlement recoveries of \$46 million
- We expect a rebound in servicing margins in 2021 on declining CPR and higher revenues from loans exiting forbearance

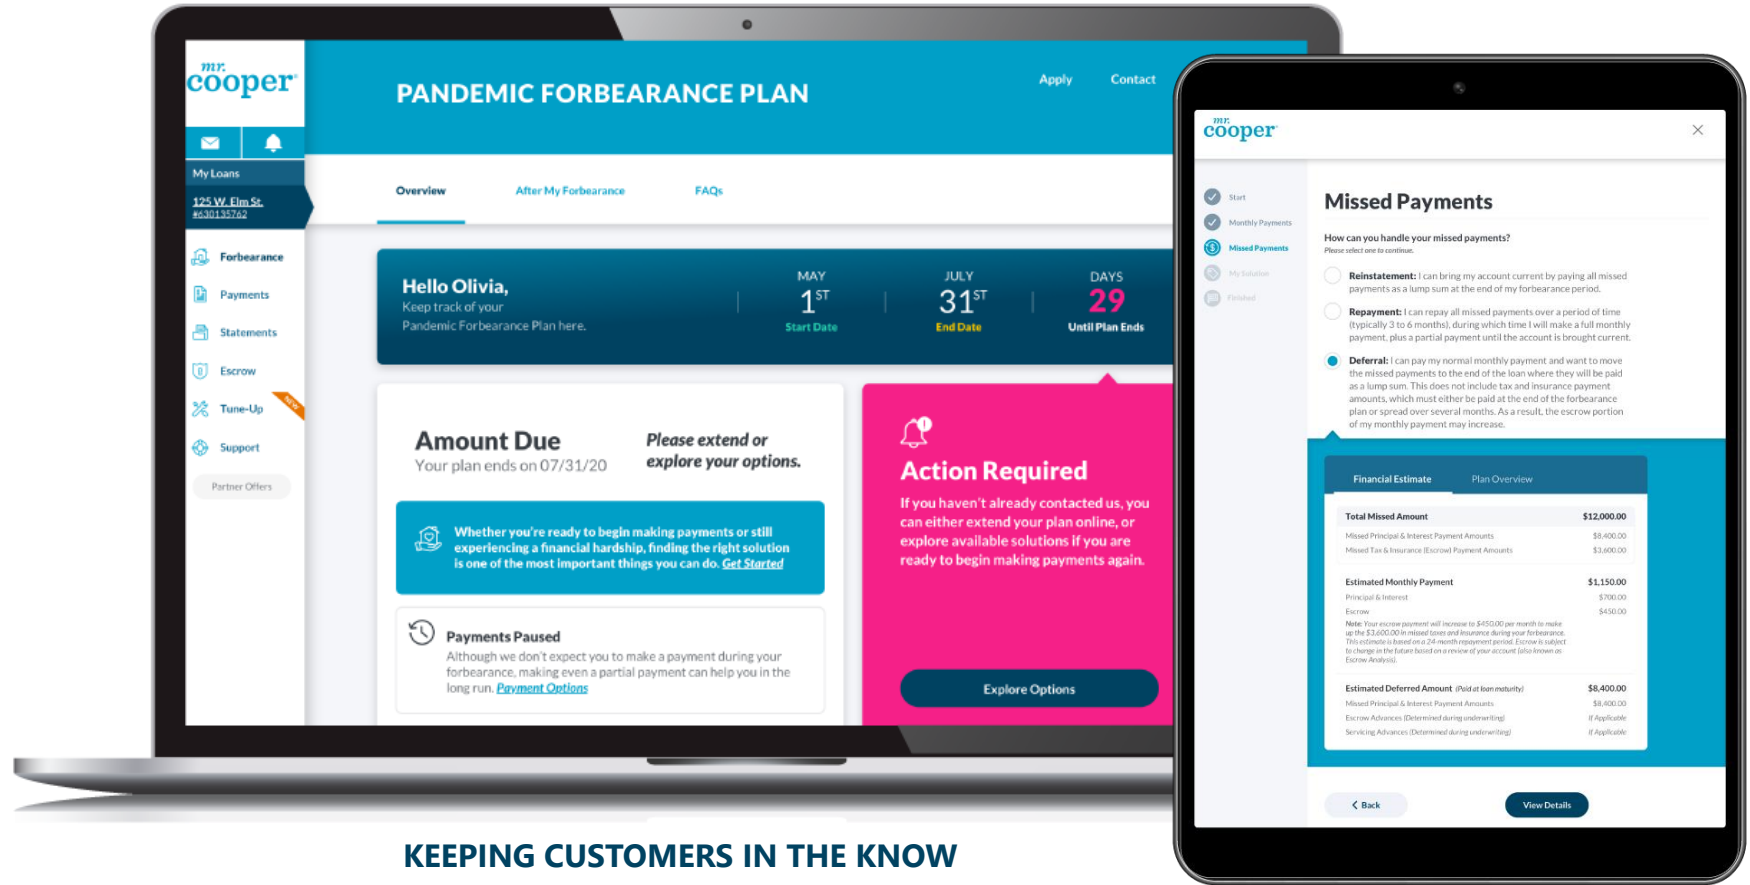

Amortization and Forward Interest Income Margin (bps)

- Combined effect of higher amortization and lower yields on custodial deposits has reduced servicing margin by 6.5 bps year-over-year. Impact of higher year-over-year amortization alone is \$156 million on an annualized basis

INNOVATIVE FORBEARANCE SOLUTIONS

- 78% of customers digitally engaged
- 61% digital uptake for entry and 43% forbearance exit
- As of October 25th, 2020, 6.1% of customers on forbearance, down from peak of 7.2%

ROTCE is a non-GAAP financial measure that is computed by dividing annualized earnings by average tangible common equity. Tangible common equity equals total stockholders' equity less goodwill and intangible assets. The methodology of determining tangible common equity may differ among companies. Management believes that ROTCE is a useful financial measure because it measures the performance of a business consistently and enables investors and others to assess the Company's use of equity. We are unable to provide a reconciliation of the forward-looking non-GAAP financial measure to its most directly comparable GAAP financial measure because we are unable to provide, without unreasonable effort, a meaningful or accurate calculation or estimate of amounts that would be necessary for the reconciliation due to the complexity and inherent difficulty in forecasting and quantifying future amounts or when they may occur. Such unavailable information could be significant to future results.
