**JANUS CAPITAL GROUP SUBSIDIARY INTECH WINS MANDATE
FOR THE PEOPLE’S REPUBLIC OF CHINA’S NATIONAL COUNCIL FOR SOCIAL
SECURITY FUND (“NSSF”)**

HONG KONG – Janus Capital Group Inc. (“Janus Capital”) today announced its subsidiary INTECH (Enhanced Investment Technologies, LLC) had been awarded a US equity Enhanced Index mandate from The People’s Republic of China’s National Council for Social Security Fund (“NSSF”). The award marks Janus Capital’s first step towards serving mainland China’s institutional investment community and its first win from China’s strategic reserve fund, set up in 2000 to support future social security expenditures.

“This award reflects further global recognition of the strong demand we’re seeing for INTECH’s unique and highly disciplined investment process,” said **Erich Gerth, Chief Executive Officer of Janus Capital International Limited**. “It’s also recognition of our long-term commitment during the past seven years to building a sustainable business serving institutional and professional investors throughout Asia.

“INTECH is clearly emerging as one of the managers of choice for institutional investors in the region looking for enhanced index providers that can offer risk-controlled equity management with high information ratios,” said **David Schofield, President of INTECH’s international division**.

INTECH will manage a US Enhanced Index equity strategy benchmarked against the S&P 500 Index. Drawing on its unique mathematical investment process, INTECH attempts to outperform the benchmark index within the confines of benchmark-like risk.

Ilex Lam, Janus Capital Regional Director for **Asia Pacific ex Japan**, said: “I am confident that INTECH will continue to build on its successful efforts over the past few years in winning new business to become one of the leading providers of enhanced and risk-managed equity strategies in Asia.”

By capitalizing on the natural price movement of individual stocks, INTECH portfolios seek to offer better upside potential than the market with less relative risk. INTECH has used this process to successfully manage money for institutional clients and investors since 1987, reflecting one of the longest continuous records of mathematical equity investment strategies in the industry.

Created by Dr. Robert Fernholz, INTECH Chief Investment Officer, INTECH's proprietary investment process relies on precise mathematical methodology rather than fundamental analysis of companies. INTECH begins by identifying target weights for individual stocks in the portfolio with high relative volatility to the benchmark and low correlation to each other. With those characteristics, INTECH builds a portfolio of stocks -- within specific risk constraints -- designed to take advantage of the natural volatility of stock price movement. The result is a portfolio of stocks that seeks to produce an overall return greater than the benchmark index, but with less relative risk. This structured process results in virtually no style drift.

About Janus Capital Group Inc.

Founded in 1969, Denver-based Janus Capital Group Inc. (NYSE: JNS) is a recognized leader of growth and risk-managed investment strategies.

At the end of September 2006, Janus Capital Group managed \$158.3 billion in assets for more than four million individual and institutions clients around the globe. Outside the U.S. it has offices in London, Tokyo, Hong Kong and Milan.

Janus Capital Group consists of Janus Capital Management LLC, Enhanced Investment Technologies, LLC (INTECH) and Capital Group Partners, Inc. (doing business as Rapid Solutions Group). In addition, Janus Capital Group also owns 30% of Perkins, Wolf, McDonnell and Company, LLC.

About INTECH

Headed by Chief Executive Officer Robert Garvy, INTECH was founded in 1987 following research undertaken by Dr. Robert Fernholz, the company's Chief Investment Officer, and the publication of his paper in 1982 on mathematical investment processes called "Stochastic Portfolio Theory and Stock Market Equilibrium." Headquartered in Palm Beach Gardens, Florida, and with research facilities in Princeton, New Jersey, the company employs 62 staff and manages approximately \$55.6 billion in assets as of September 30, 2006.

Issued by Janus Capital International Limited, authorised and regulated by the Financial Services Authority and in Hong Kong by Janus Capital Asia Limited, licensed and regulated by the Securities and Futures Commission.
